6' x 10' Dual/Tandem Cutting and Parts List

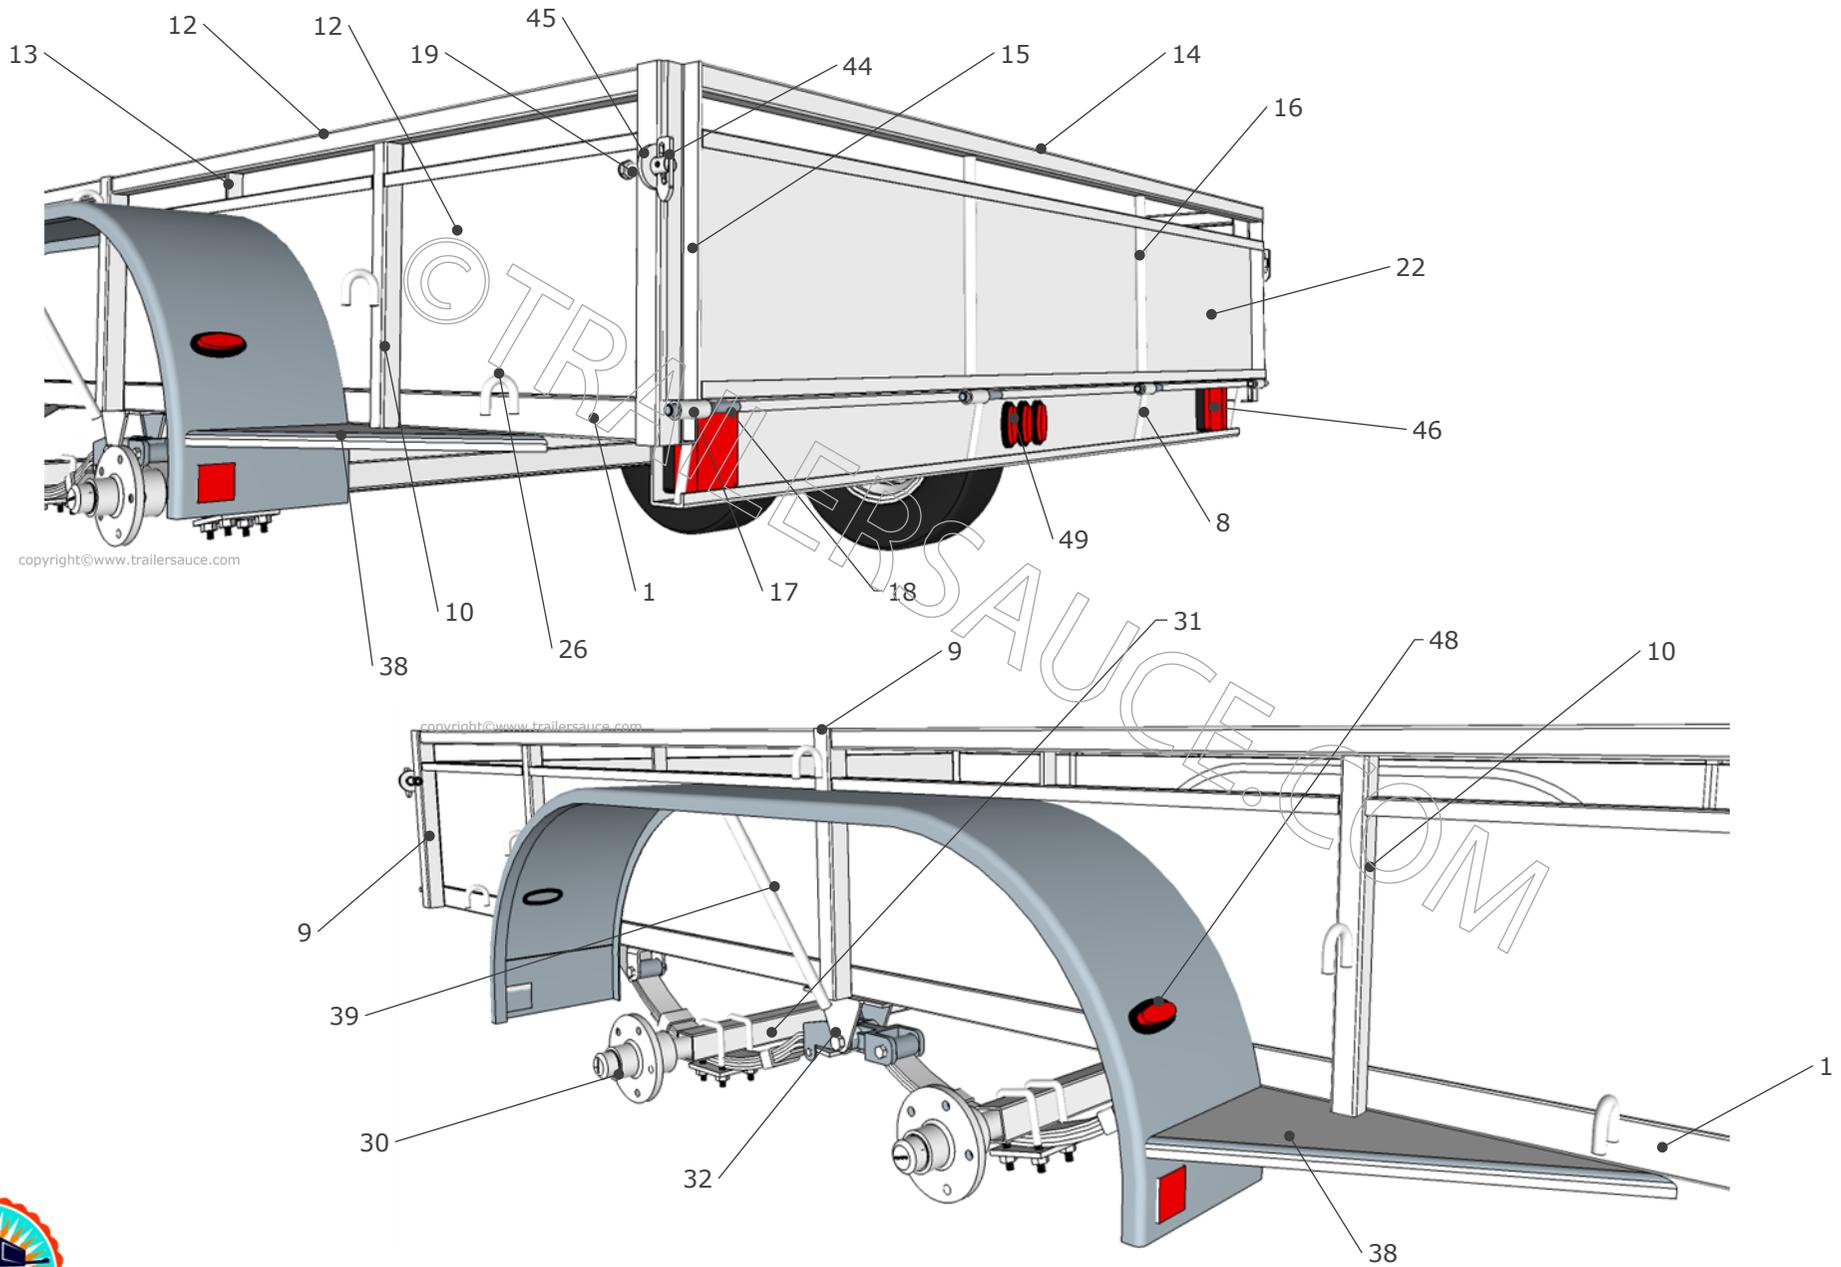

| Part | Material | Length/Description | Quantity |
|--|---|---|--------------|
| 1 Chassis Rails | 1" x 2" x 1/8" RHS | 120" | 2 |
| 2 Cross Members | 1" x 2" x 1/8" RHS | 70" | 6 |
| 3 Cross Members - Mid section | 2" x 2" x 1/8" SHS | 70" | 2 |
| 4 Tongue Main Sections | 2" x 3" x 3/16" RHS | Approx 7'4" before trimming | 2 |
| 5 Tongue Insert | 3" x 3" x 3/16" SHS | 24" | 1 |
| 6 Tongue Brace | 2" x 3" x 1/8" RHS | Approx 16" before trimming | 1 |
| 7 Light Channel | 3/16" Mild Steel plate | 70" L x 11 3/4" W | 1 |
| 8 Light Channel Rods | 1/2" Solid Rod | Approx 5" long- grind to fit light channel | 4 |
| 9 Front/Rear/Center Side Uprights | 1 1/2" x 1 1/2" x 1/8" SHS | 17" | 6 |
| 10 Central Side Uprights | 1 1/4" x 1 1/4" x 1/8" SHS | 15 3/4" | 6 |
| 11 Tie Rails Sides - Front | 1 1/4" x 1 1/4" x 1/8" SHS | 4' 11 3/4" | 2 |
| 12 Tie Rails Sides - Rear | 1 1/4" x 1 1/4" x 1/8" SHS | 4' 7 3/4" | 2 |
| 13 Tie Rail Mid Support Plates | 1" x 1/4" Flatbar | 13/4" | 4 |
| 14 Tie Rails Tailgates | 1 1/4" x 1 1/4" x 1/8" SHS | 70" | 2 |
| 15 Tailgate Uprights | 1 1/4" x 1 1/4" x 3/16" Angle | 15" | 4 |
| 16 Tailgate Centre Upright | 1/2" Solid Rod | 1' 11 1/16" | 4 |
| 17 Hinge Pipes | 1/2" NB Medium Pipe | 2" or as per supplied with gudgeons | 8 |
| 18 Hinge Gudgeons (Main & End) | 1/2" Solid Rod | As per supplied | 8 |
| 19 Droplock Tubes | 9/16" ERW Tube (Thin wall) | 1 1/2" | 4 |
| 20 Sides - Front panel | 14 gauge (0.080") Panel Steel | 8' L x 14' 11 1/16" W | 2 |
| 21 Sides - Rear panel | 14 gauge (0.080") Panel Steel | 19" L x 14' 11 1/16" W | 2 |
| 22 Tailgates | 14 gauge (0.080") Panel Steel | 70" L x 16" W | 2 |
| 23 Tongue Angle Gussets | 1 1/2" x 3/16" Equal Angle Steel | Approx 4" long | 2 |
| 24 Conduit Tubes | 9/16" ERW Tube (Thin wall) | 1 1/2" long | 10 |
| 25 Spring Packers | 1" x 2" x 1/8" RHS | Approx 5" required - cut to suit chassis | 6 pcs |
| 26 Tie Hooks | 3/8" or 1/2" Solid Rod | 4" long before bending- can use 1/2 chain links | 10 |
| 27 Deck | As required | | 1 |
| 28 Tires | ST215/75R 14" Tires | 1800 lb minimum load rated per tyre | 4 |
| 29 Wheels | 14" galvanised / painted | | 4 |
| 30 Hubs | 1750 lb hubs (rated per each) | Can be upgraded to braking hubs/spindles | 2 pr |
| 31 Axle | 2" x 2" x 3/16" SHS | Spindles to match hubs | 2 |
| 32 Oscillating Rocker Assembly | To suit springs type and width | | 1 pr |
| 33 Springs | 4 or 5 leaf leaf/slipper springs, 2" wide | Upgrade to higher load if required | 2 pr |
| 34 Spring hardware | 2" wide U Brackets and slippers | | 2 pr |
| 35 Spring Plates | Plates to suit 2" axle & 9/16" U bolts | | 4 |
| 36 U bolts | 2" Square U Bolts, 9/16" diameter | | 8 |
| 37 Fenders | 10" or 10 3/4" wide Dual/Tandem axle fenders, un-galvanized or galvanized | | 2 |
| 38 Fender Brace | 10 gauge (0.128") Panel Steel | 11 1/4" x 20" unfolded | 4 |
| 39 Fender Bracing Rod | 3/4" Solid round bar | 15" before trimming to fit | 2 |
| 40 Coupler | 3500 lb straight coupler to suit 3" box | Upgrade if braked | 1 |
| 41 Chain/Cables | Rated at twice GTW | | 2 |
| 42 Shackles/Hooks | As per Chain/Cable rating | | 4 |
| 43 1/2" High tensile bolt/nut & chain washer | Only required if bolting chain to tongue | | 2 |
| 44 Tailgate Drop Locks - Anti Luce | 12mm x 54mm (minimum length) Long shank thread and locknut- available on ebay | | 4 |
| 45 Tailgate Latch plate | 2" x 1/4" Flat Steel | Approx 3" long | 4 |
| 46 Lights | 4" square LED or bulb | | 2 |
| 47 Side Clearance lamps - Front | LED Sealed - Amber | | 2 |
| 48 Side Clearance lamps - Rear | LED Sealed - Red | | 2 |
| 49 Rear Marker lamps | LED Sealed - Red | | 3 |
| 50 4 Core Cable | Green, Yellow, Brown, White - 14 Gauge | | approx 26 ft |
| 51 2 Core Cable | Brown, White - 14 gauge | | approx 22 ft |
| 52 1/2" Clips | | Diameter to suit cable | 12 |
| 53 Deck Fastenings | 8G x 1 1/4" Self tapping c/sunk screws | Hot dipped galvanized | Approx 80 |
| | SHS - Square Hollow Section / RHS - Rectangular Hollow Section | | Rev A |

MAIN COMPONENTS

Matching with Bill of Materials

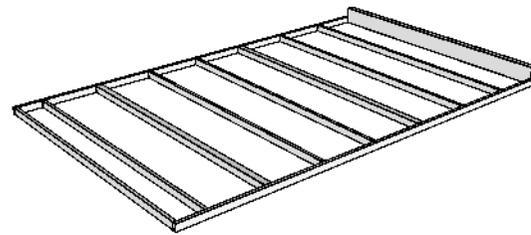

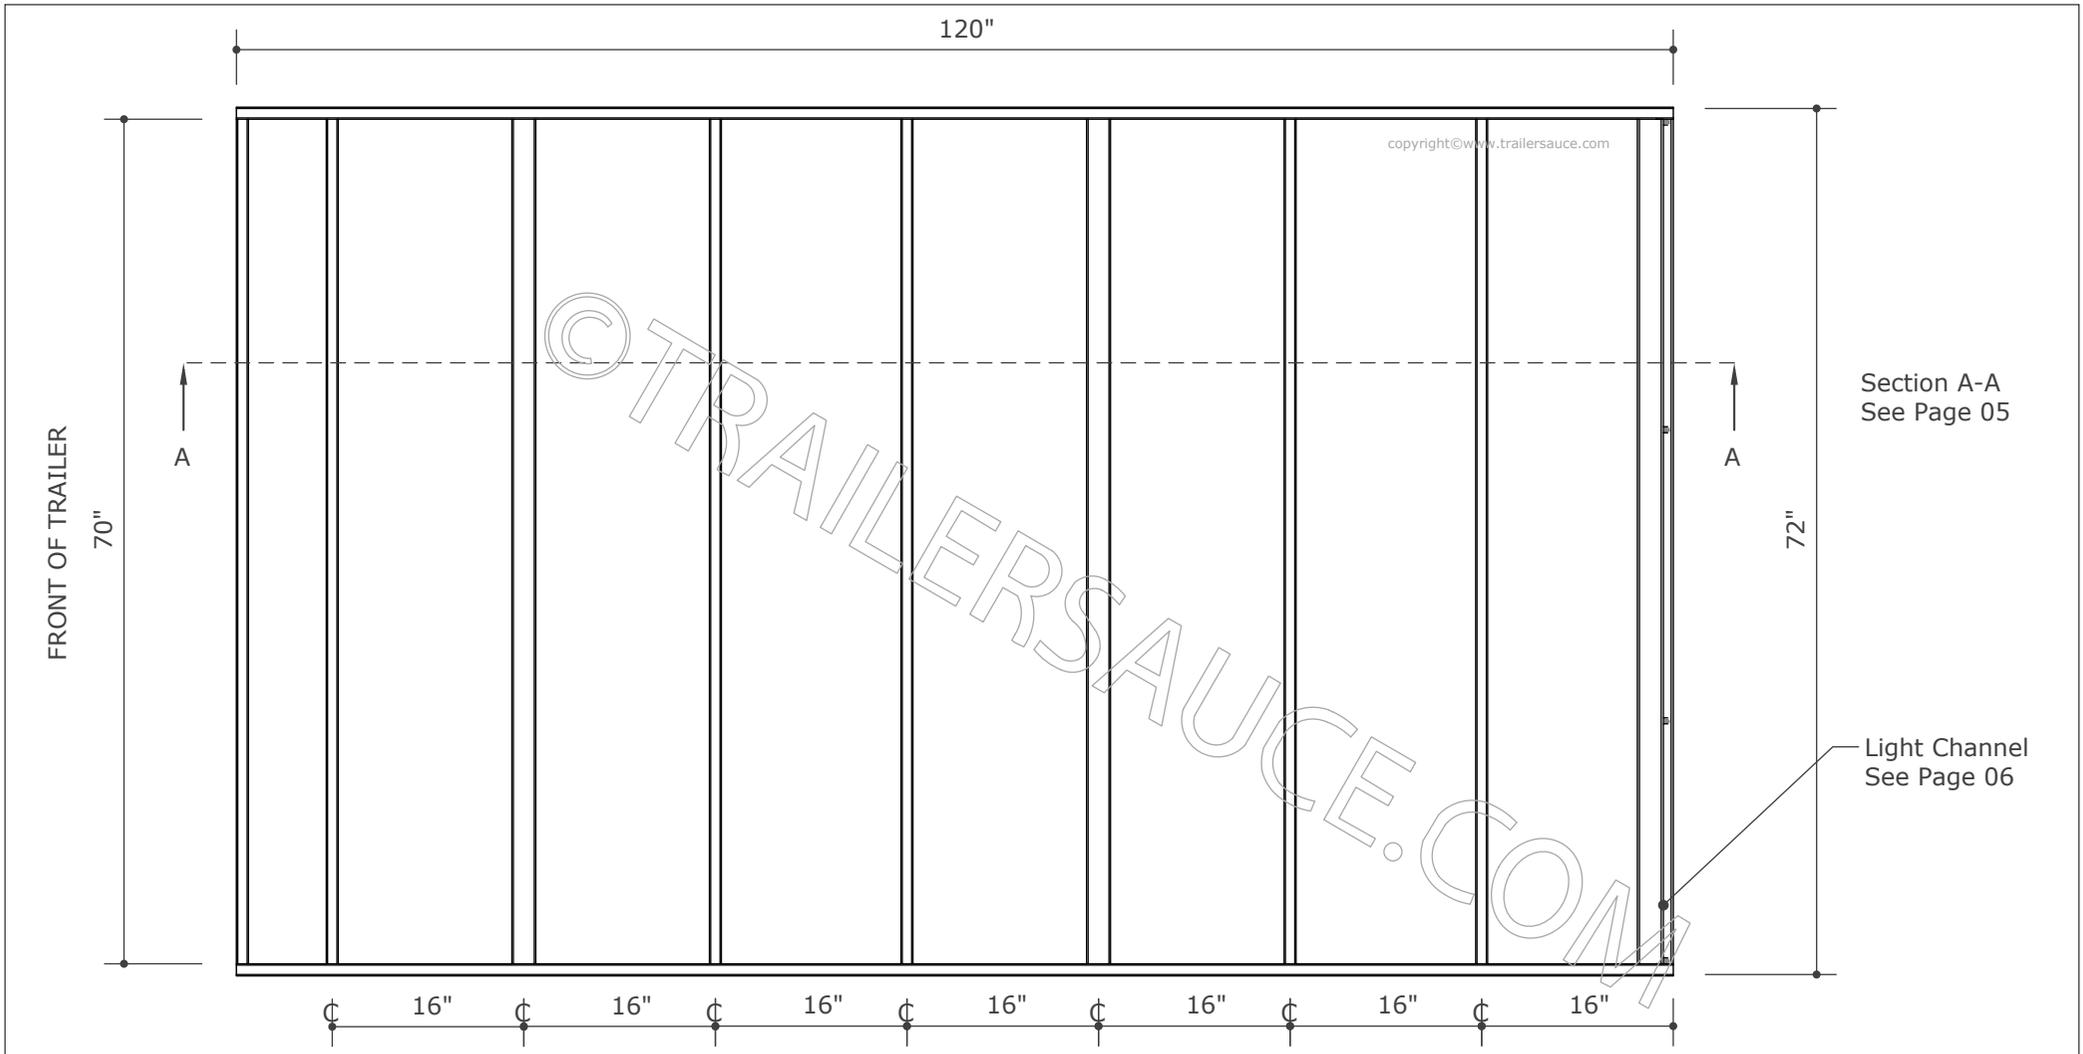

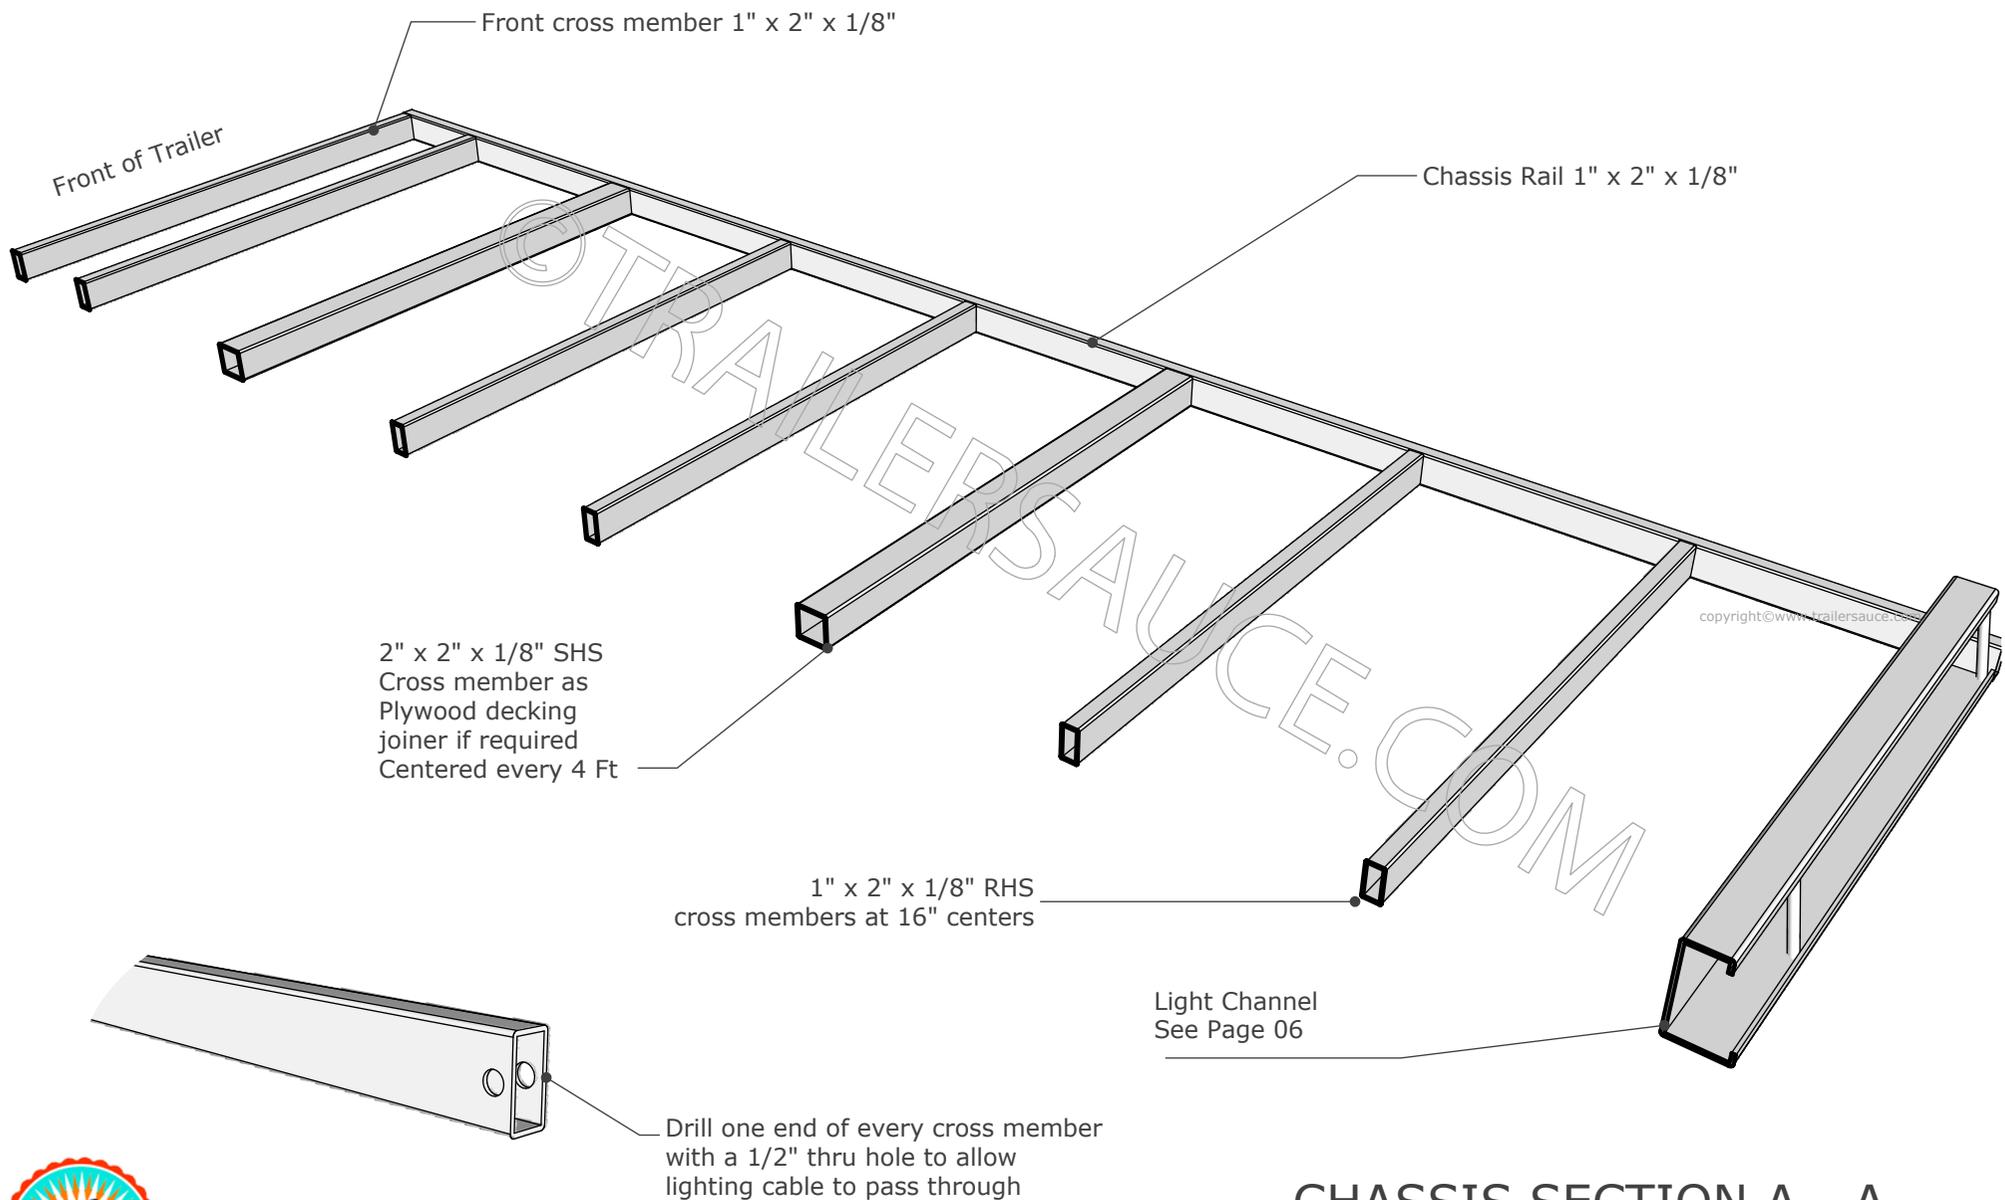

copyright@www.trailersauce.com

CHASSIS

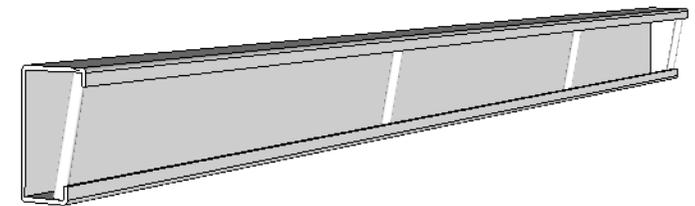

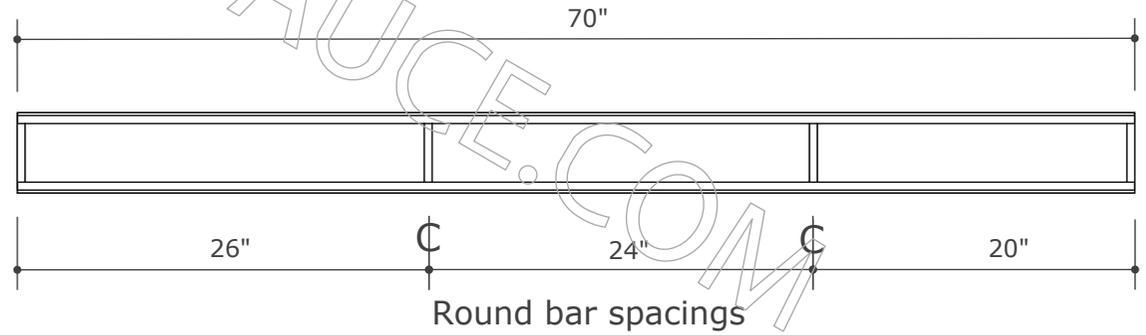

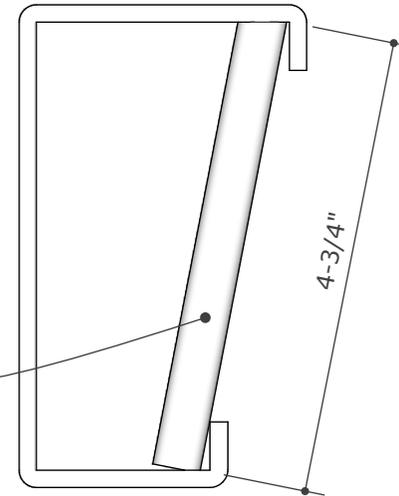

CHASSIS SECTION A - A

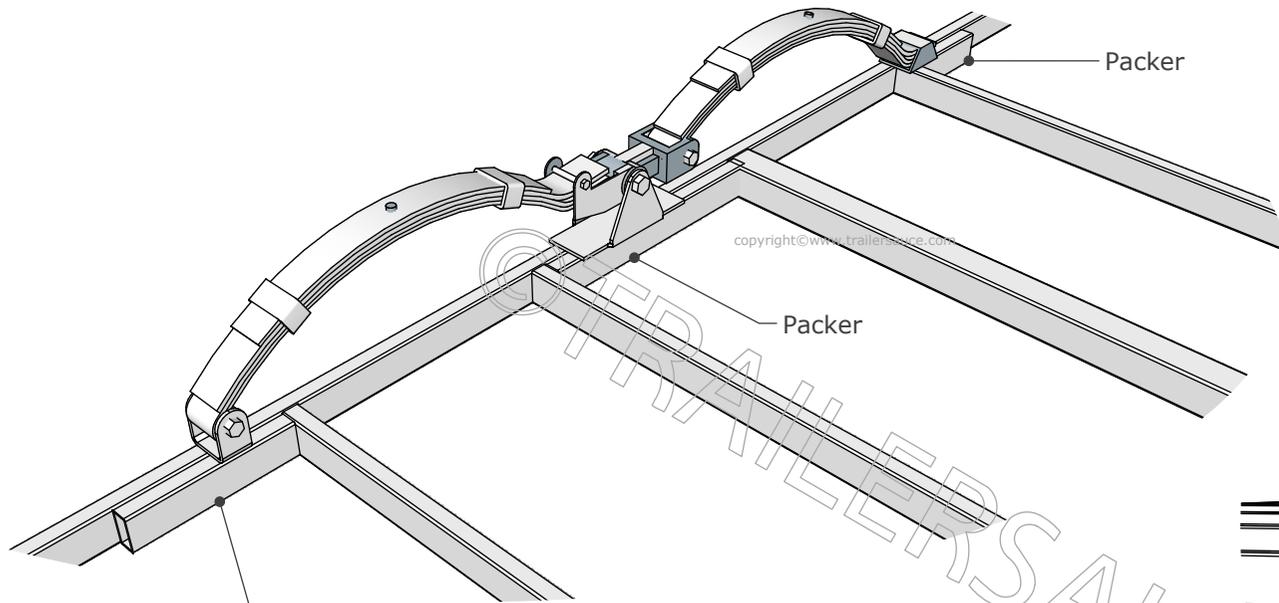

LIGHT CHANNEL
 Material - 3/16" Mild Steel
 Scale - 1:1

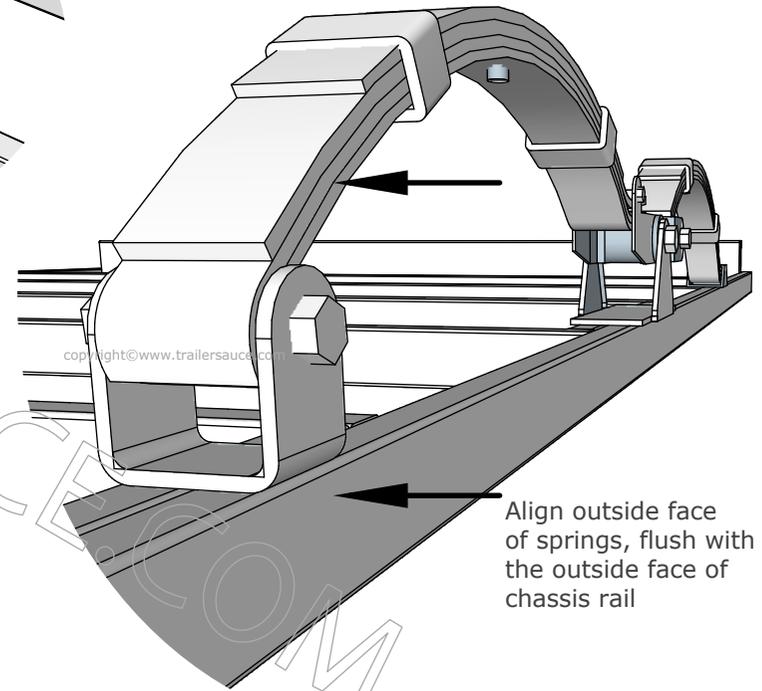

LIGHT CHANNEL

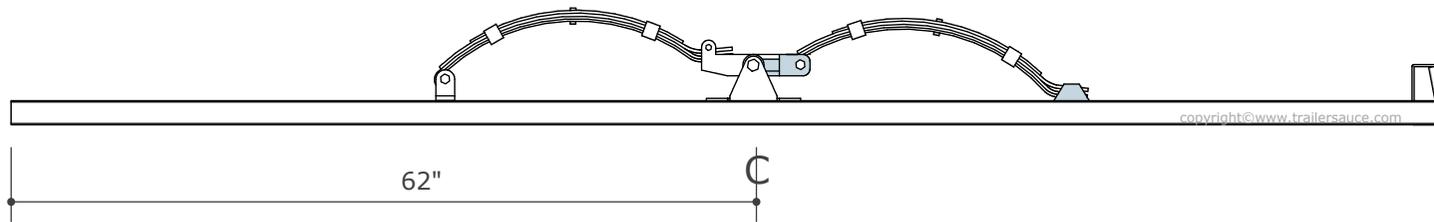

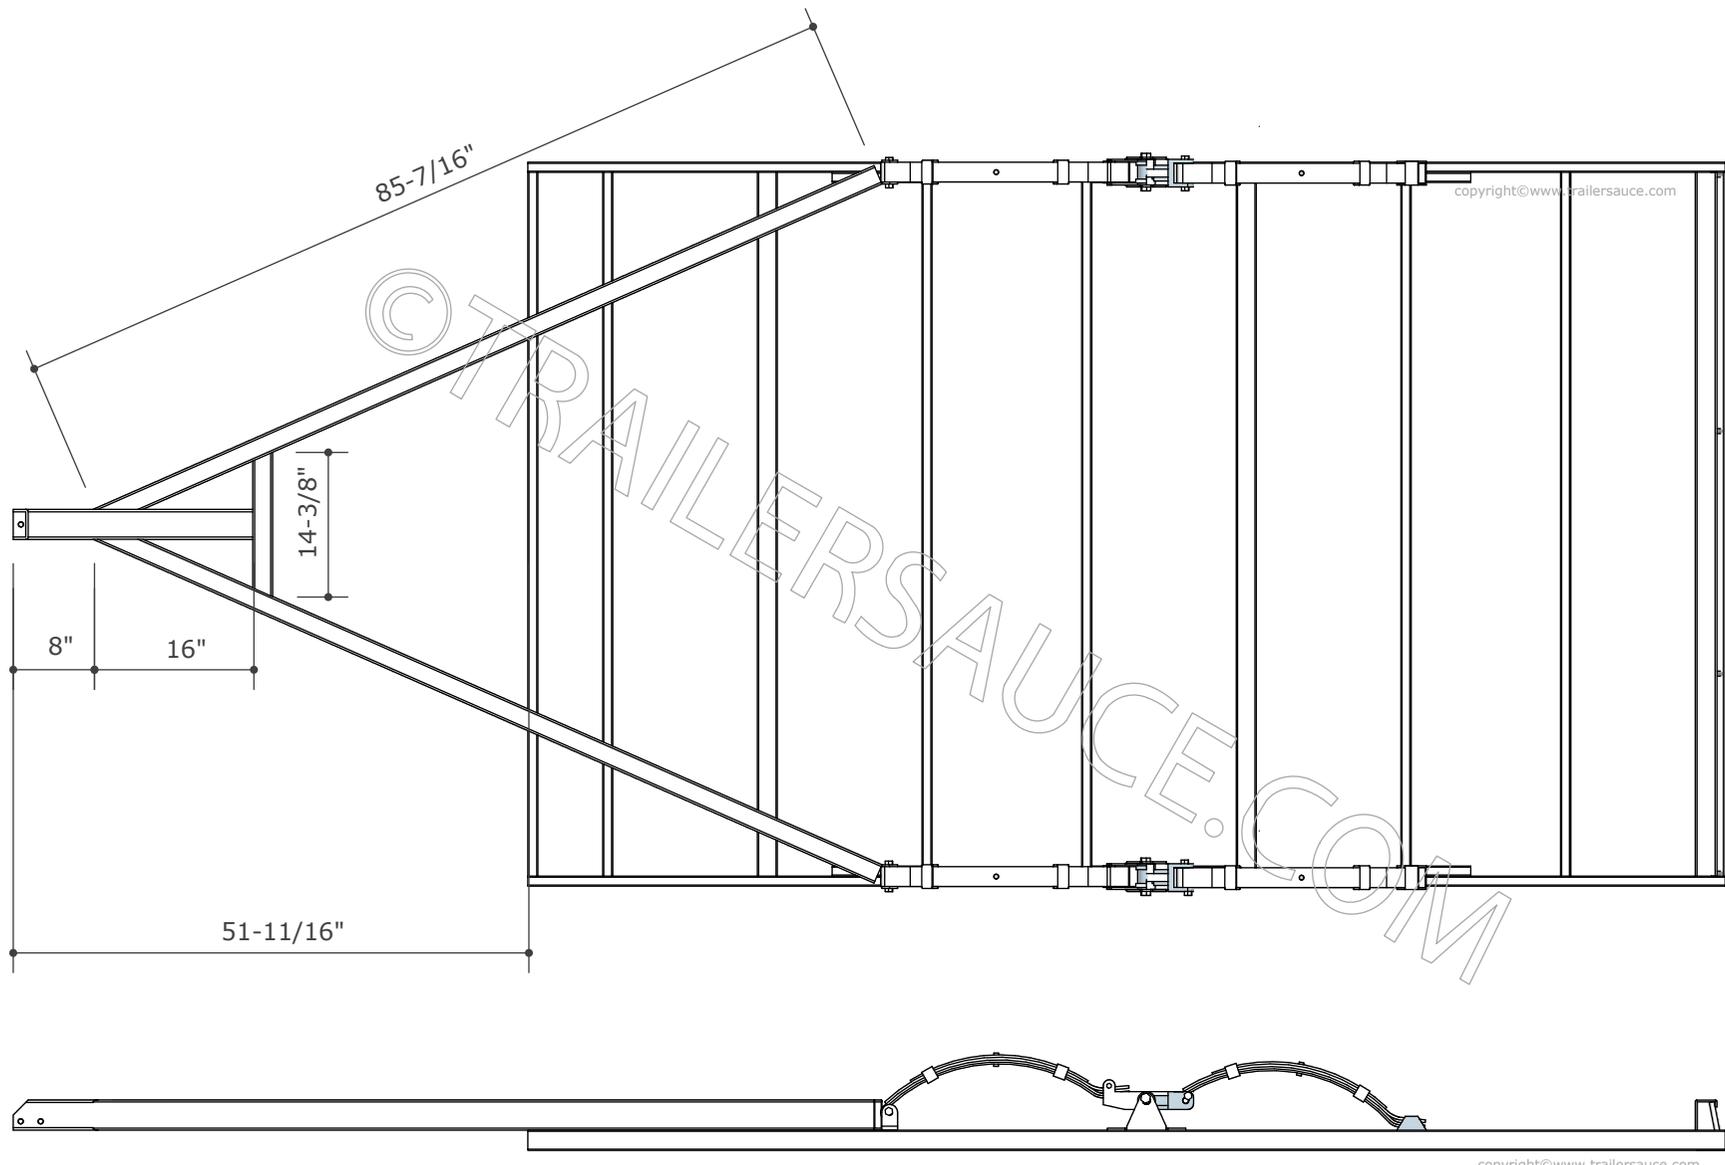

Use 1" x 2" RHS Packers to support spring hanger, rocker unit and slipper

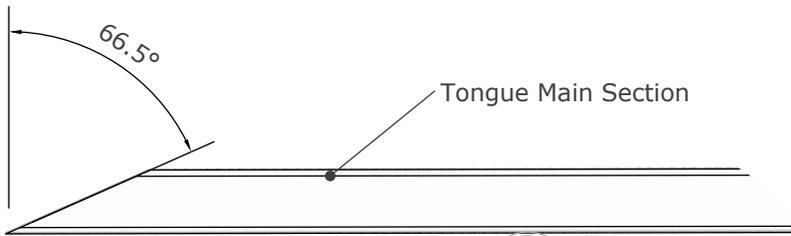

Align outside face of springs, flush with the outside face of chassis rail

Front of Trailer

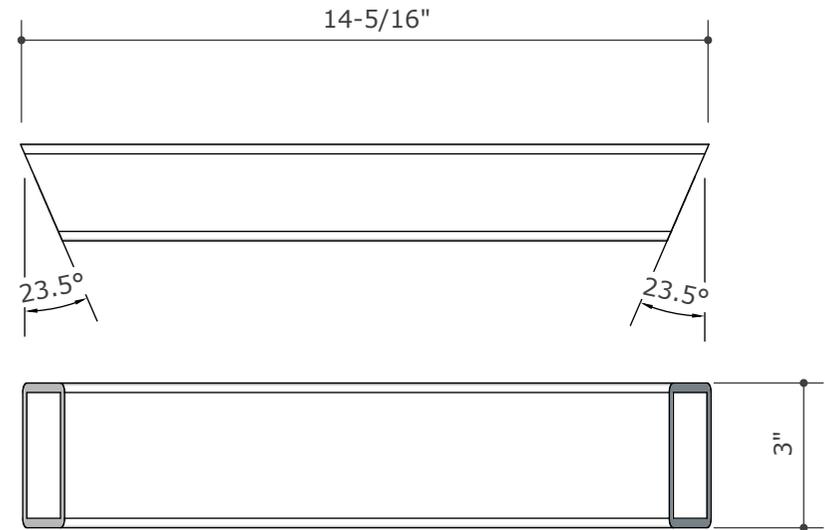

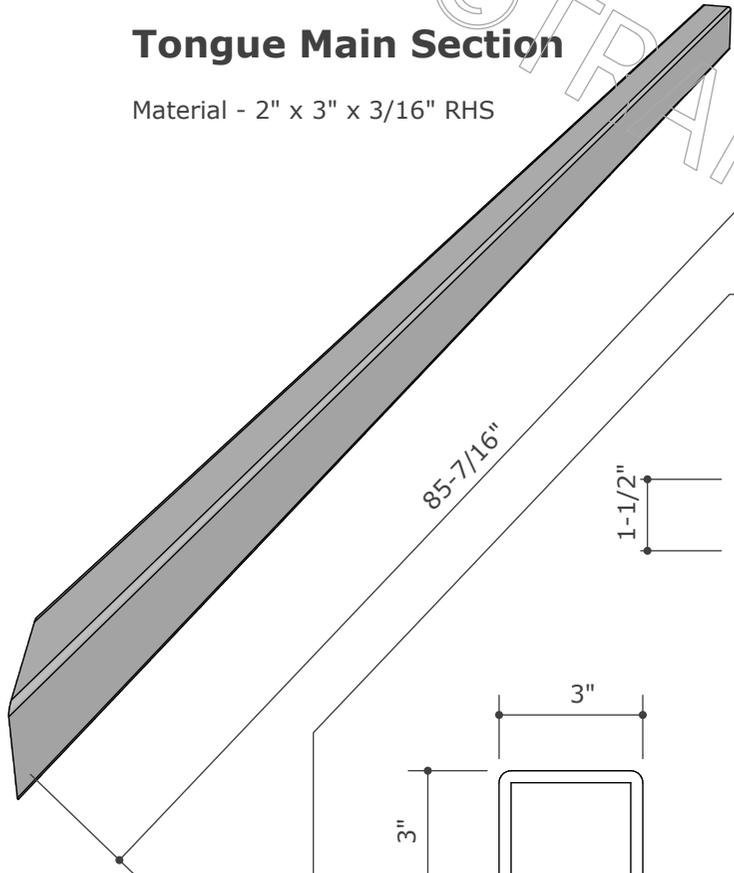

TONGUE SETUP

Tongue Main Section

Material - 2" x 3" x 3/16" RHS

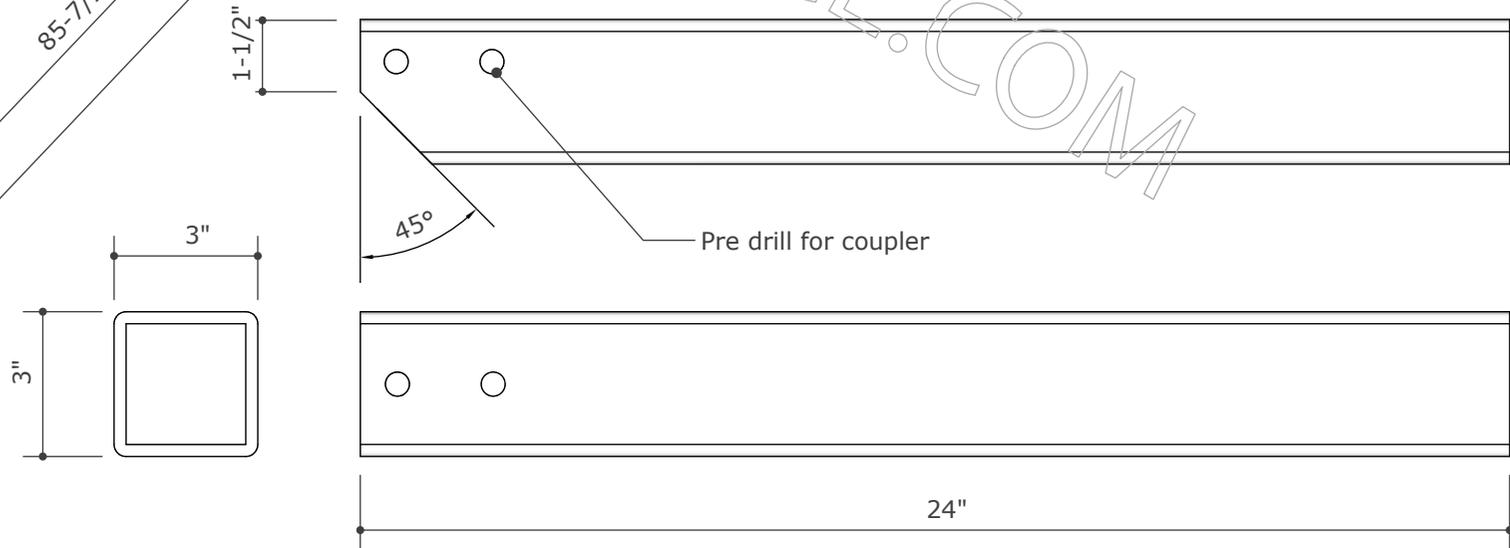

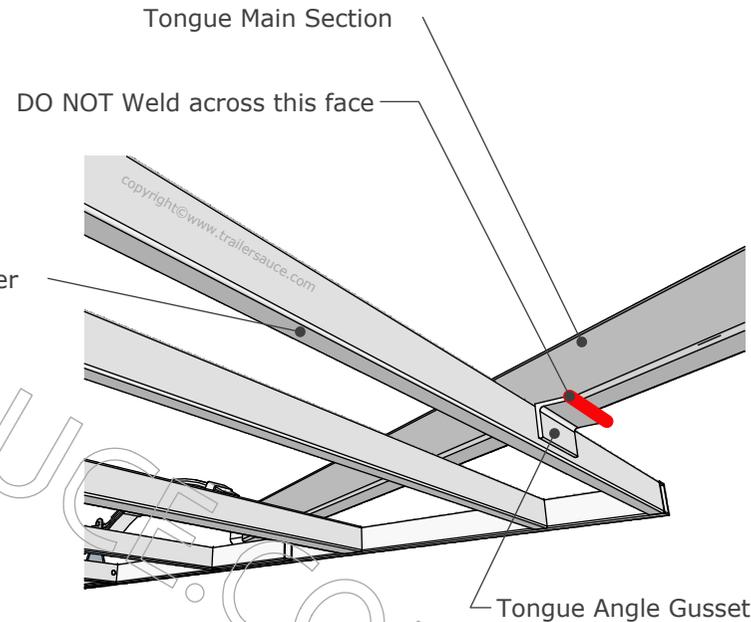

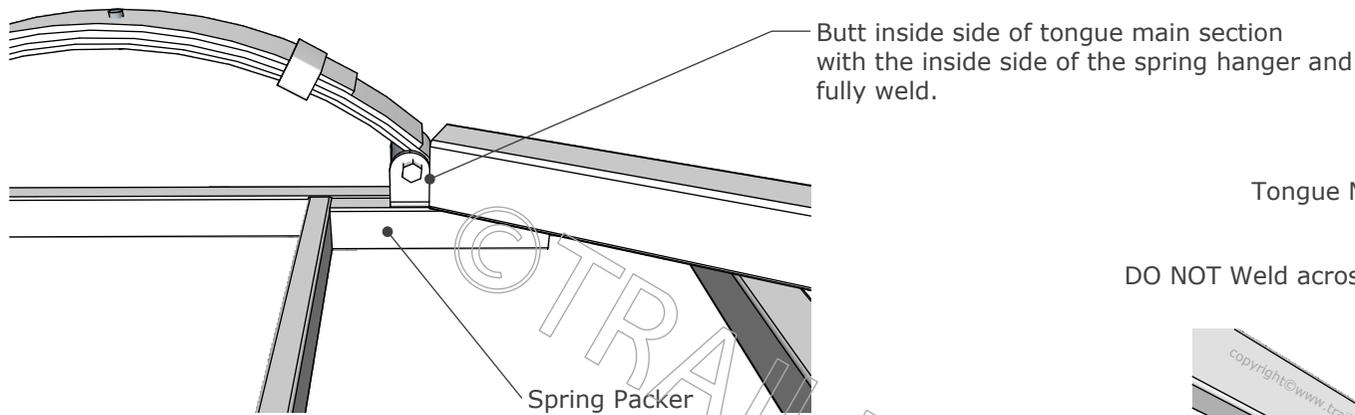

Tongue Brace

Material - 2" x 3" x 1/8" RHS

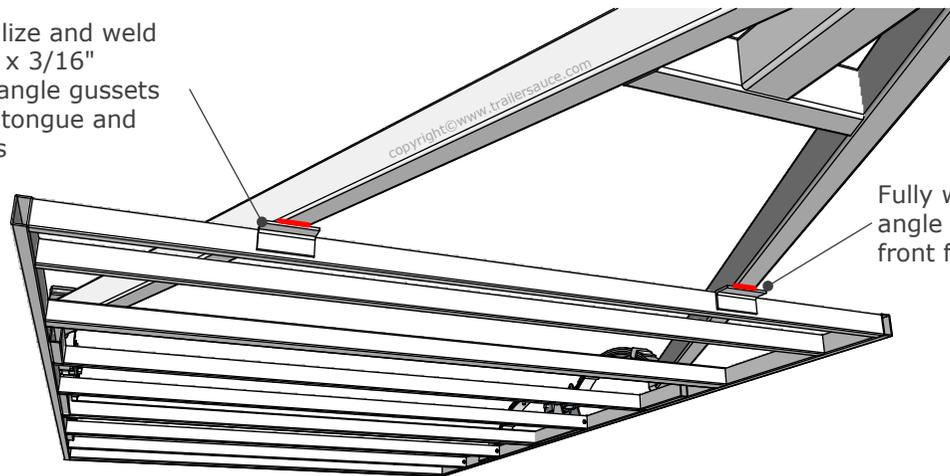

Tongue Insert

Material - 3" x 3" x 3/16" SHS

Centralize and weld
1 1/2" x 3/16"
Equal angle gussets
to the tongue and
chassis

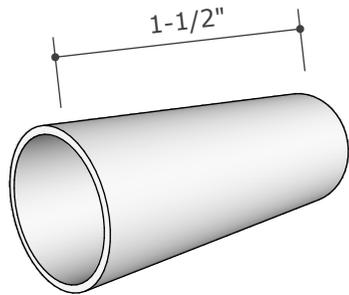

The point where the drawbar and front chassis cross member meet is where most of the stress and flexing of the tongue occur under normal use (vertical motion).

Welding across the top face of the tongue at this point can introduce additional crystalline stresses within the steel around the welds heat affected zone (HAZ), which over time may cause cracking of the base steel and failure of the tongue.

TONGUE & ANGLE GUSSET DETAIL

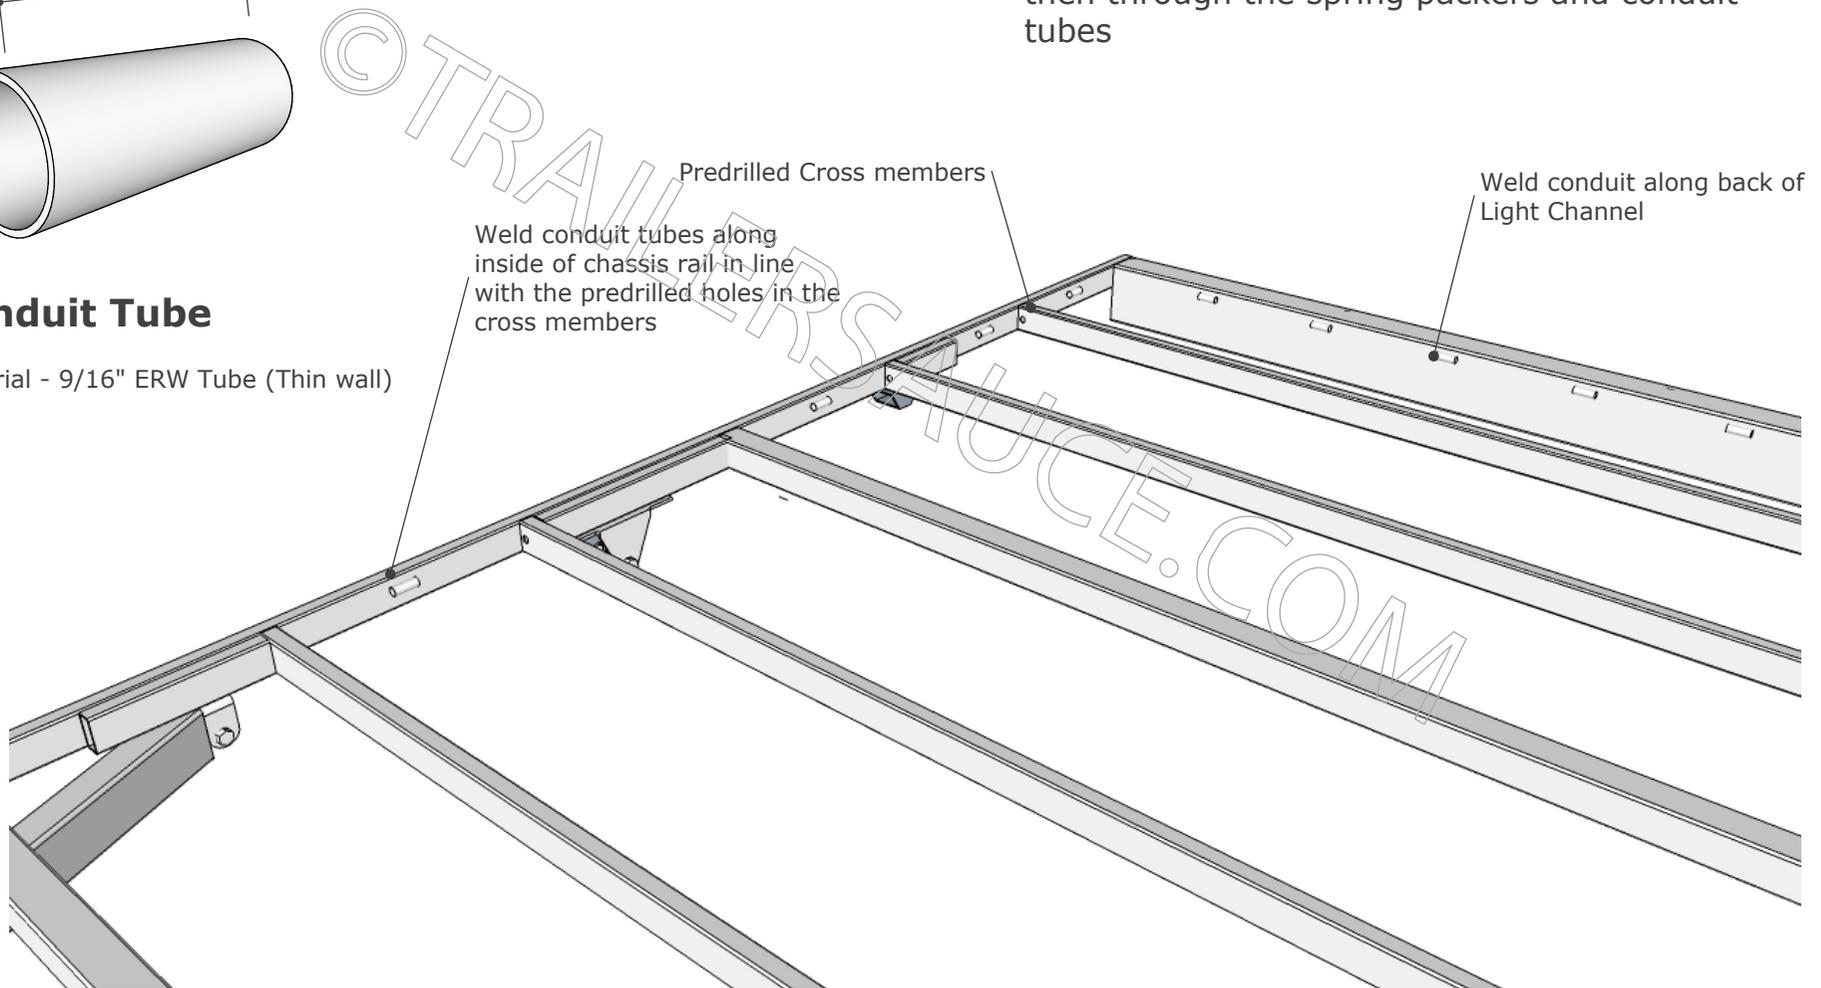

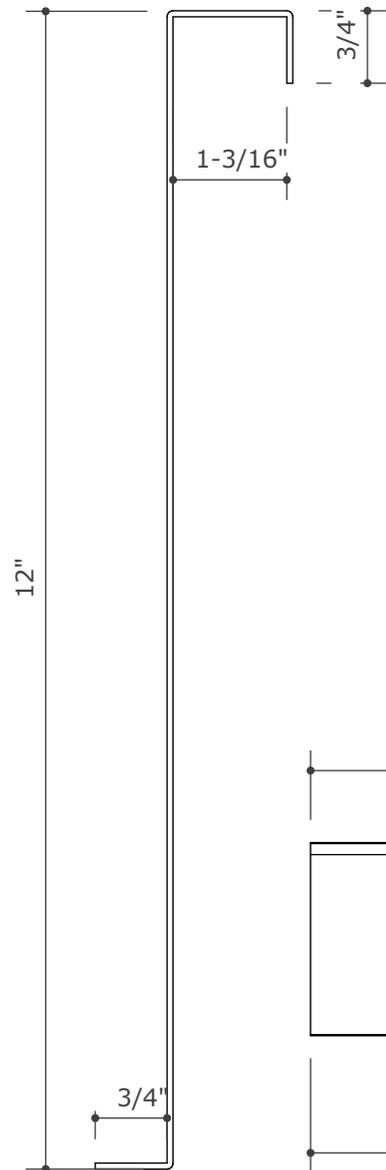

Conduit Tube

Material - 9/16" ERW Tube (Thin wall)

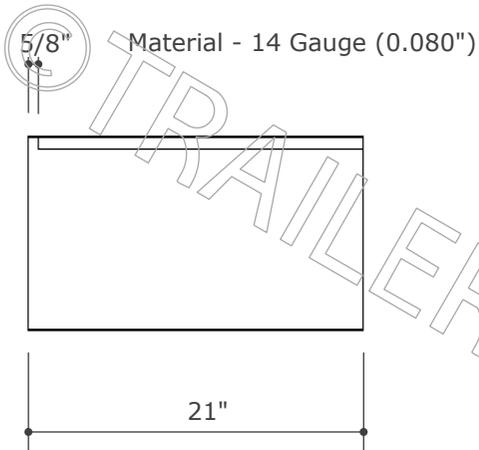

Conduit tubes are only required along the chassis rail from the end of the tongue. The lighting cable will run down the inside of the tongue and come out at the spring hanger, then through the spring packers and conduit tubes

CONDUIT TUBE

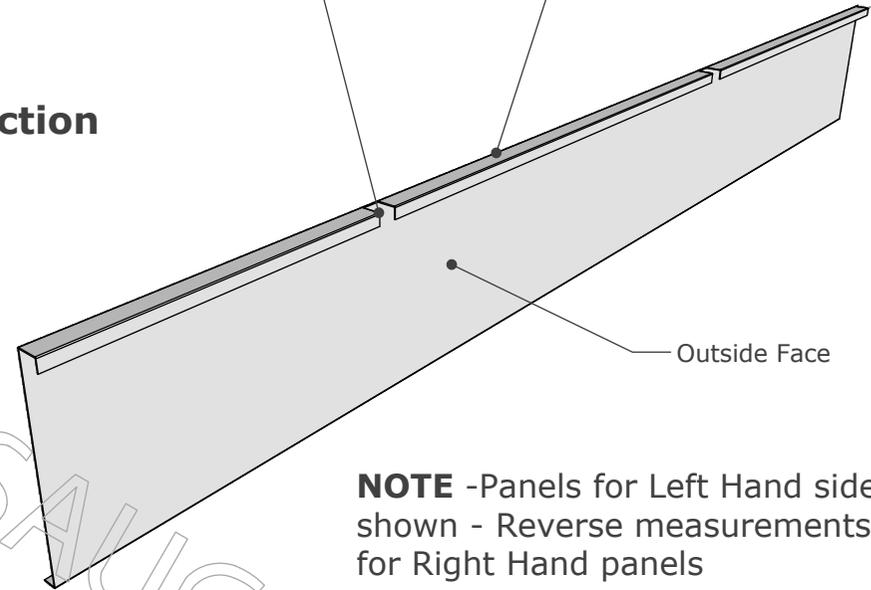

Side Panel - Rear Section

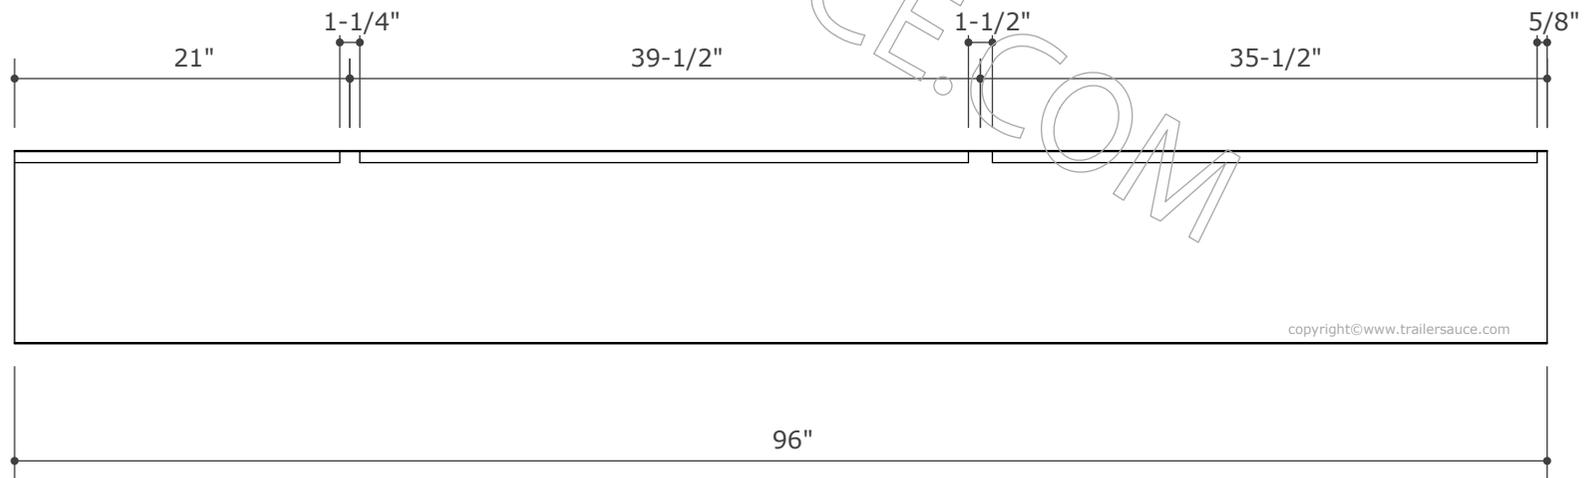

Panel top face and edge notched out for uprights

Top face & edge

Outside Face

NOTE -Panels for Left Hand side shown - Reverse measurements for Right Hand panels

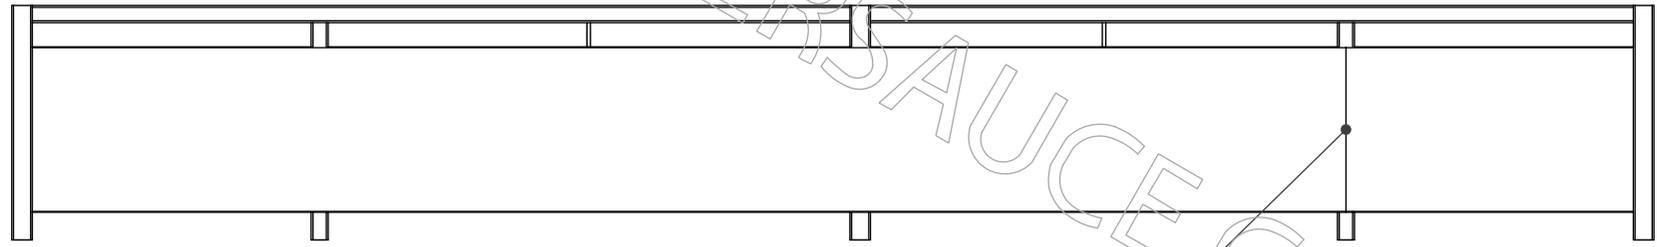

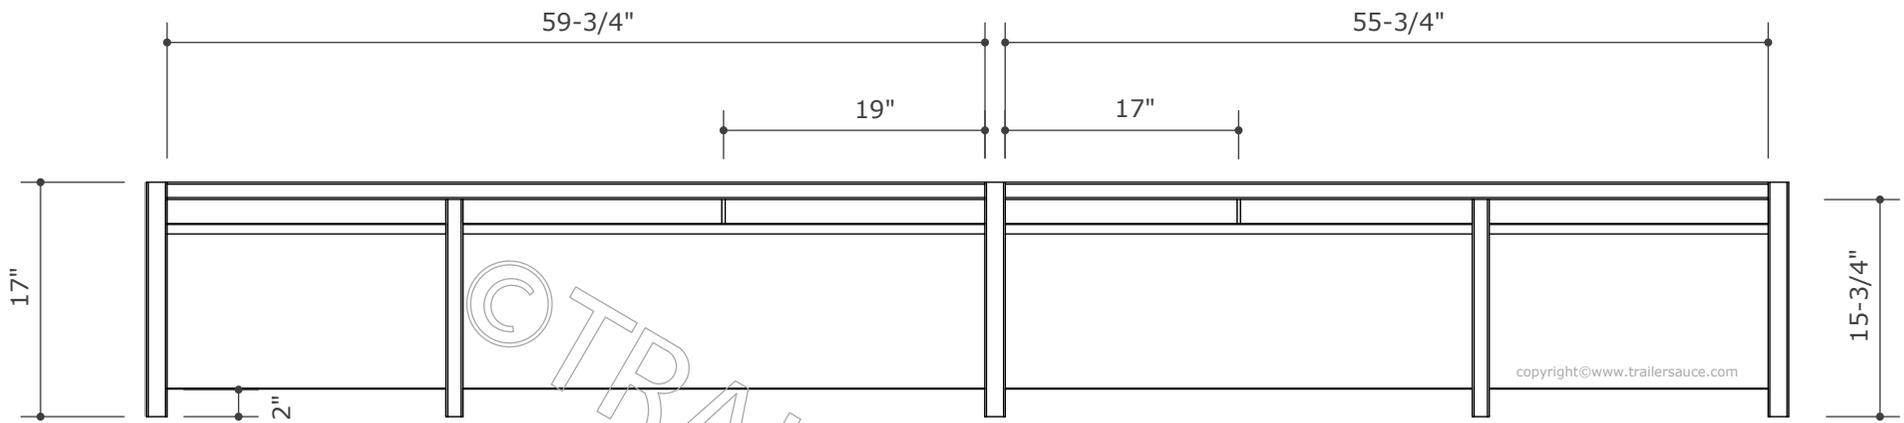

Side Panel - Front Section

Material - 14 Gauge (0.080")

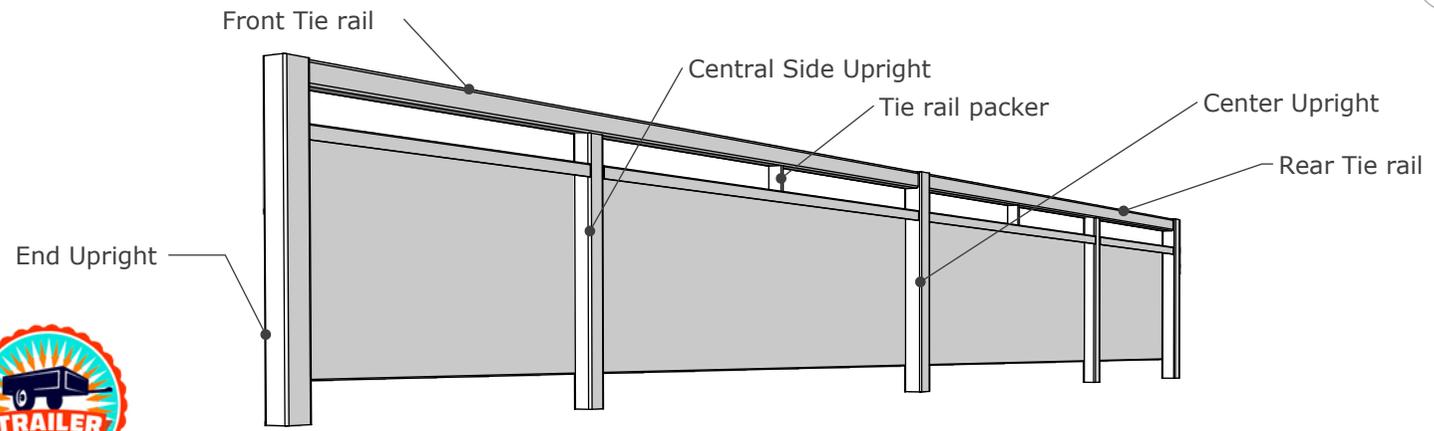

SIDE PANELS

FRONT OF TRAILER

Join front and rear panels at the upright

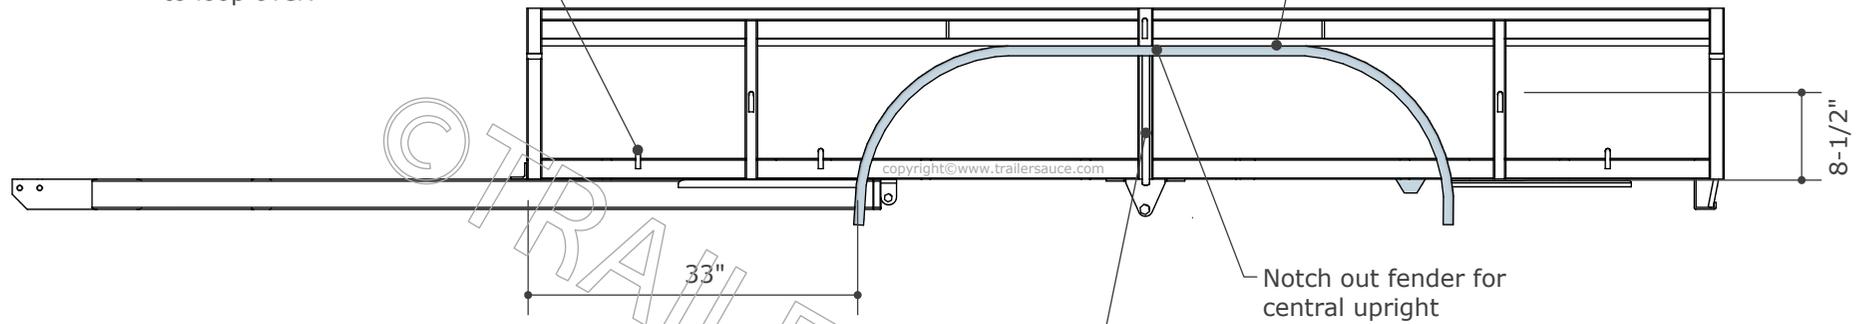

NOTE -Left Hand side shown
Reverse measurements
for Right Hand Side

SIDE DETAIL

Weld tie hooks to chassis rail, evenly spaced & high enough above the fender brace to allow lashing rope to loop over.

Set fender under side panel edge

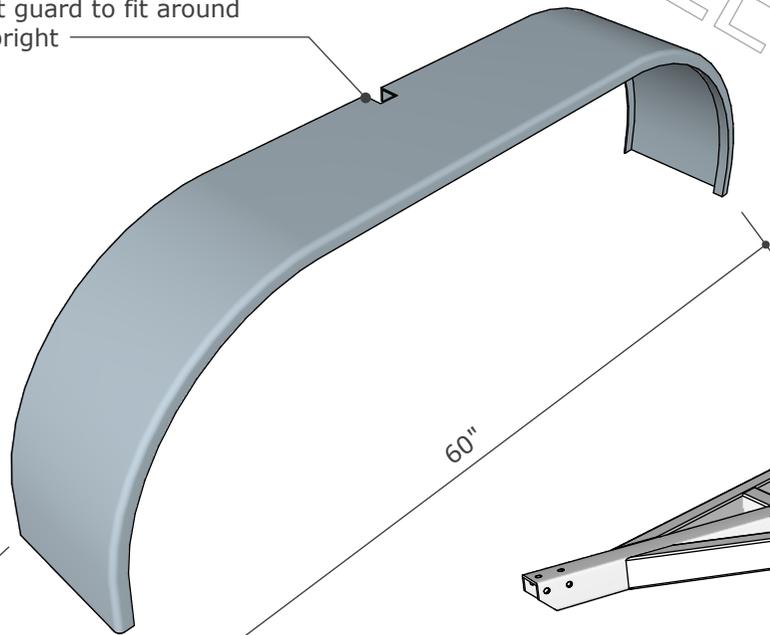

Notch out fender for central upright

Fender Bracing Rod

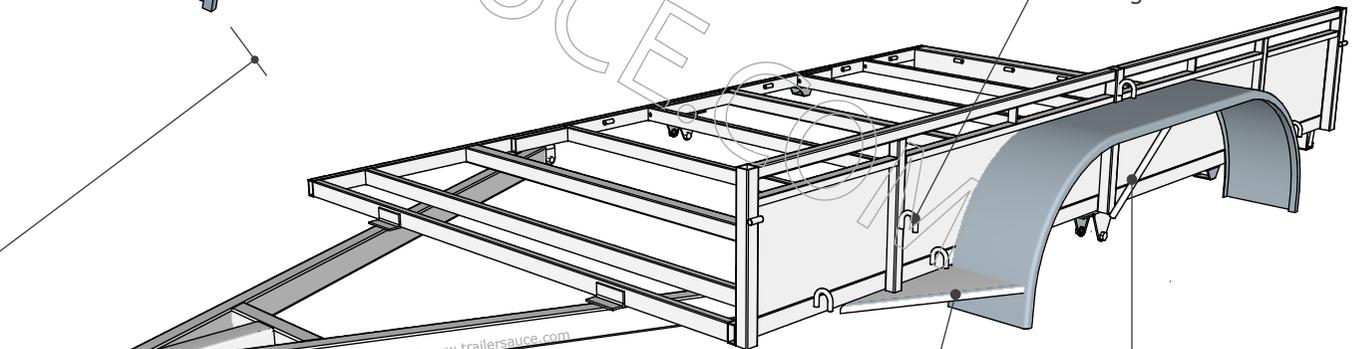

Notch out guard to fit around center upright

Tie Hooks
See Page 14 for details

60"

10" - 10 3/4"

Fender Brace
See Page 14 for details

Fender Bracing Rod

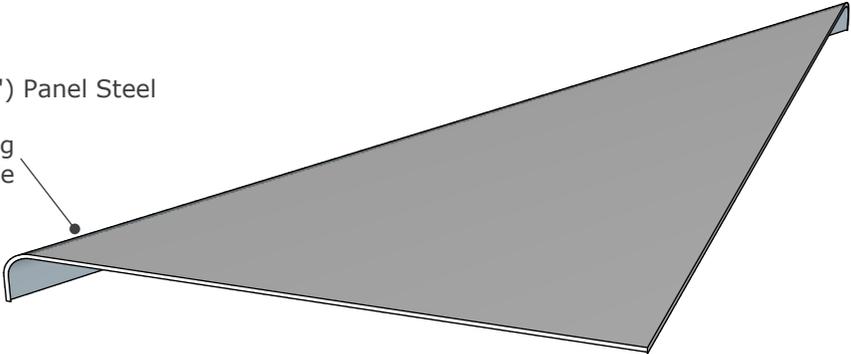

FENDER FITTING

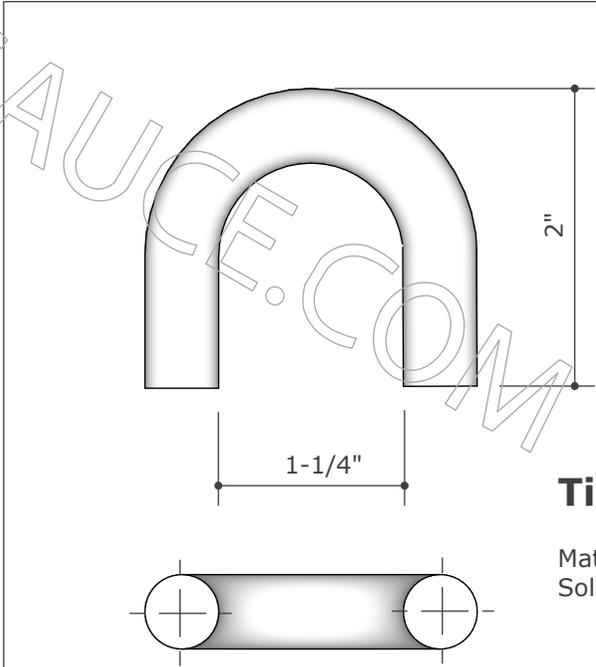

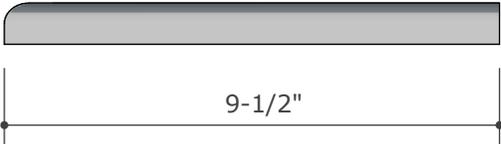

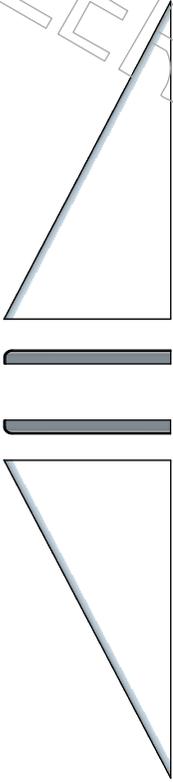

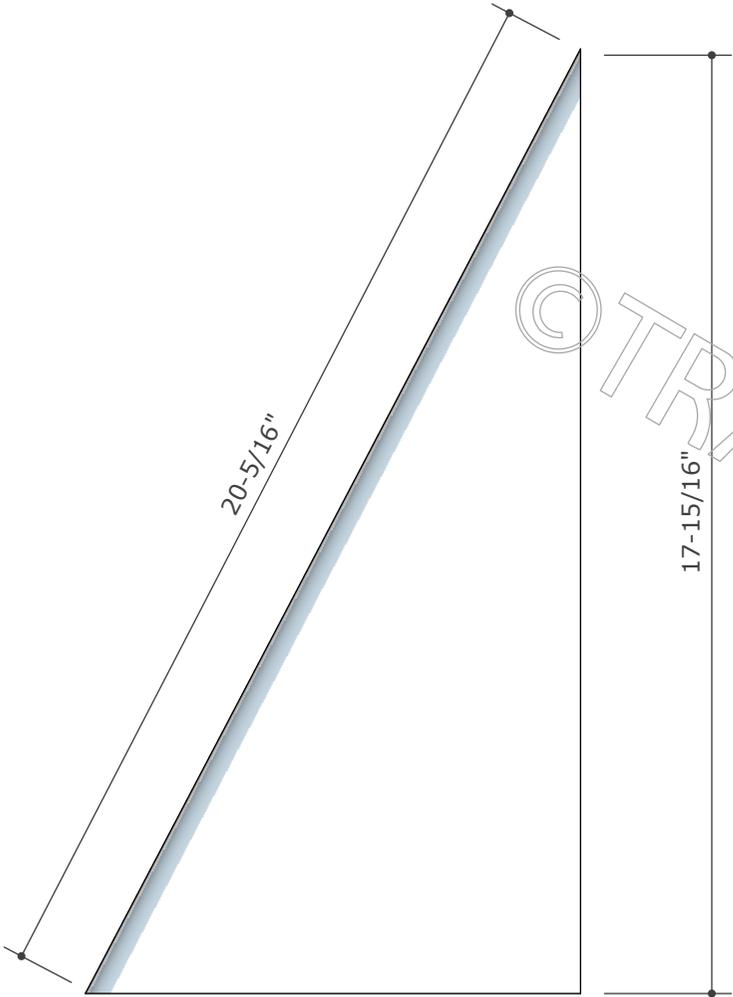

Fender Brace

Material - 10 Gauge (0.128") Panel Steel

Match edge of brace to the styling of the fender edge if possible

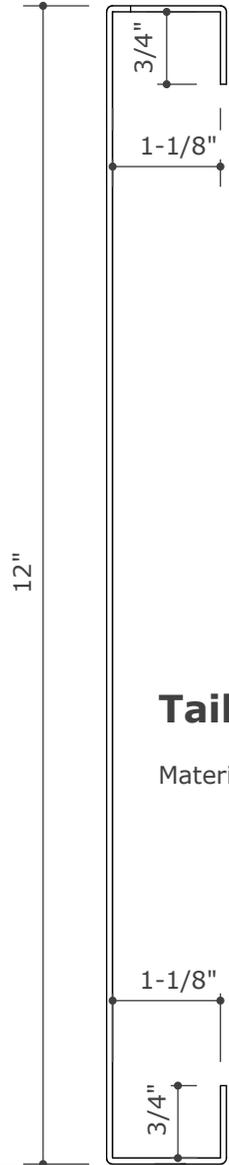

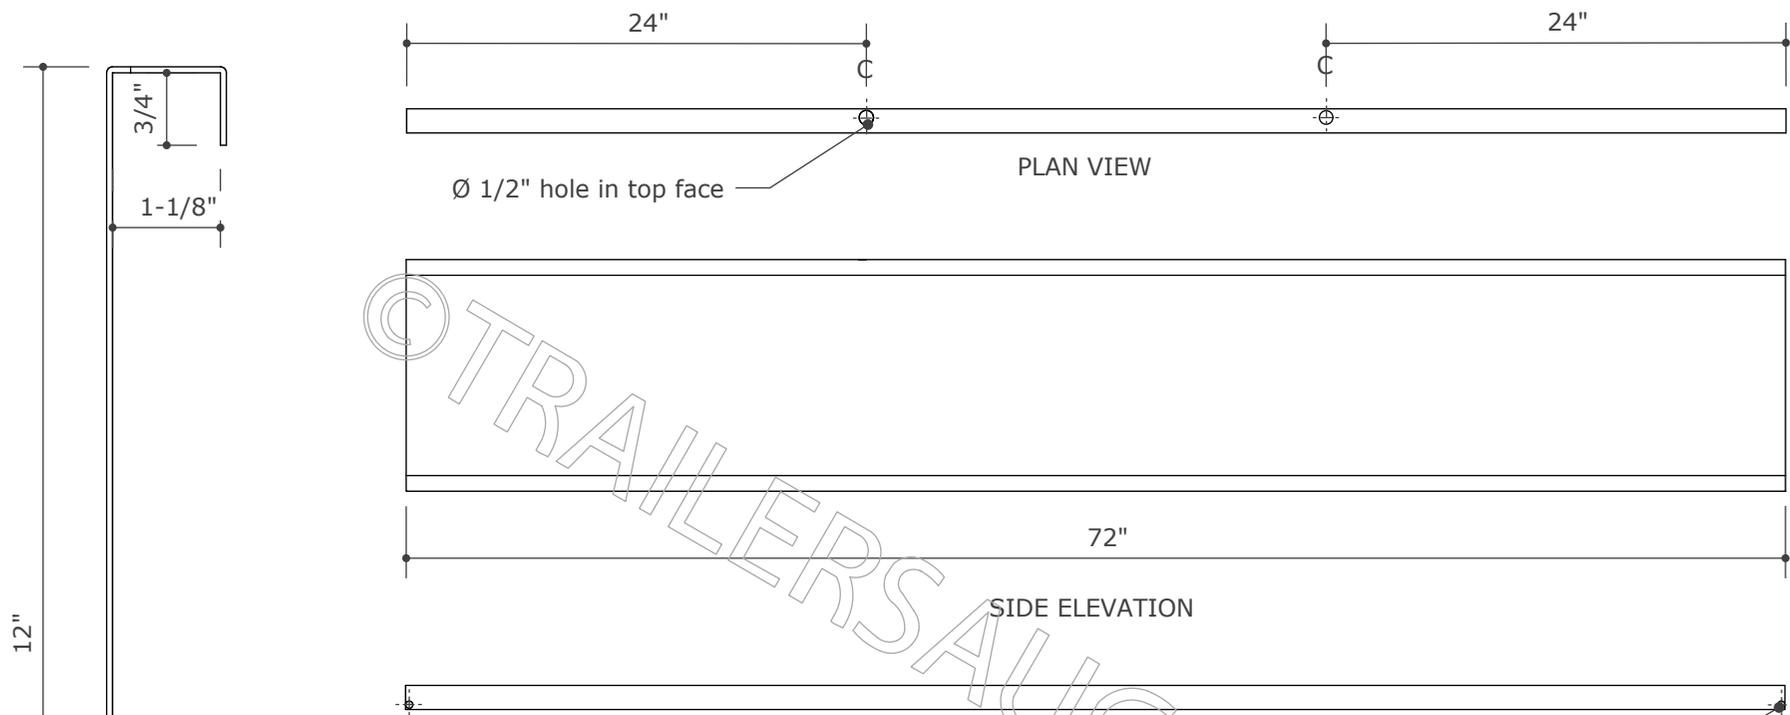

NOTE - Fabricate 2x braces as per the main drawing and 2x braces as mirror image (reverse) as per below

Tie Hook

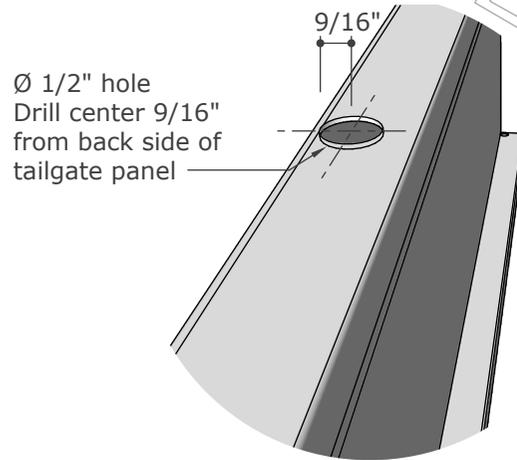

Material- 3/8" or 1/2" Solid Round Bar

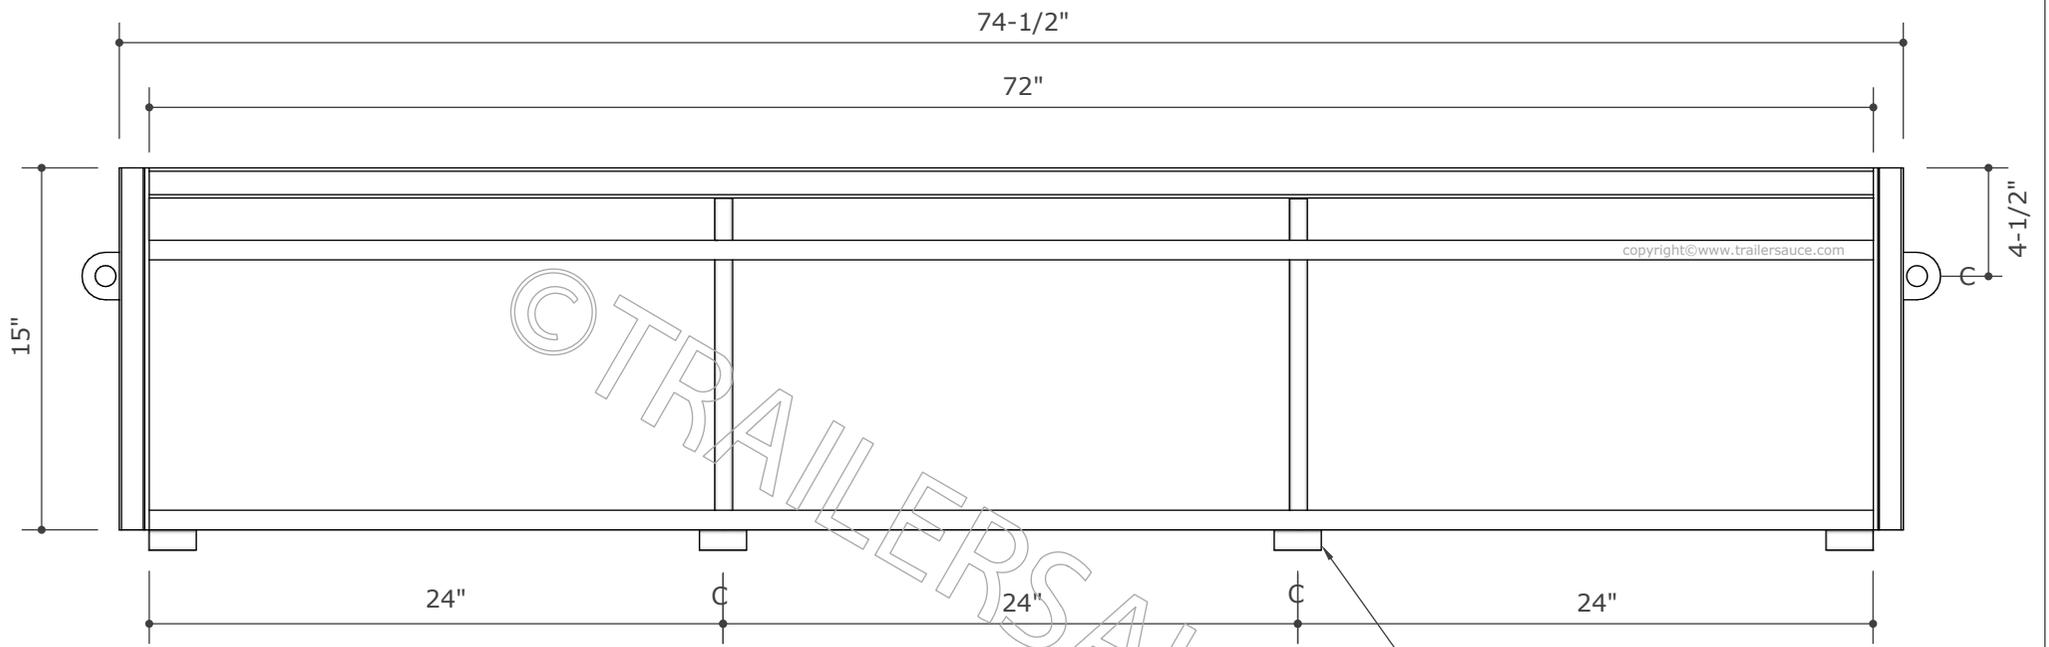

Tailgate Panel

Material - 14 Gauge (0.080") Panel Steel

TAILGATE PANEL DETAIL

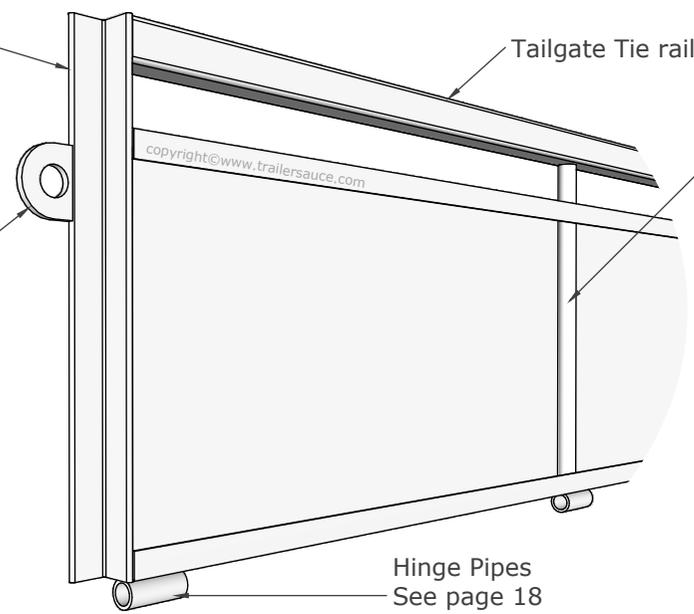

Tailgate Upright

Tailgate Tie rail

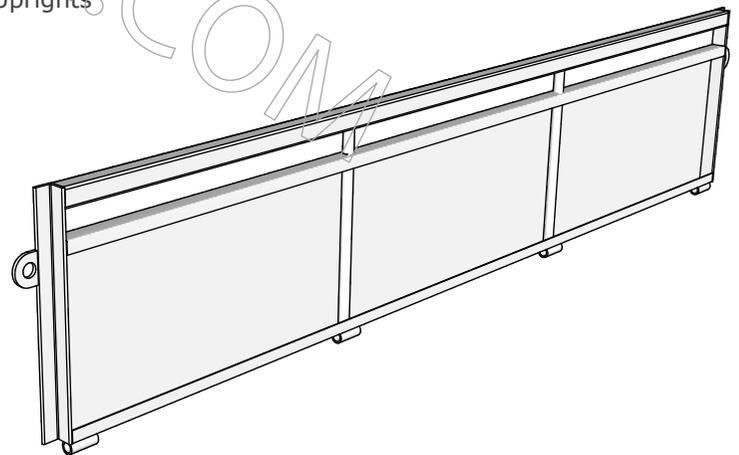

Center Uprights

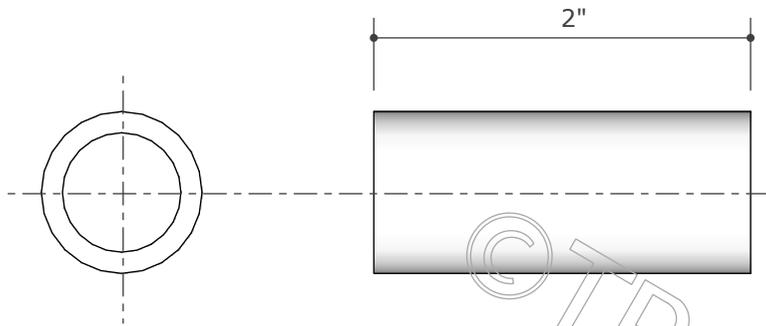

See page 19 for hinge pipe fitting details

Lug Latch Plate
See page 18 for details

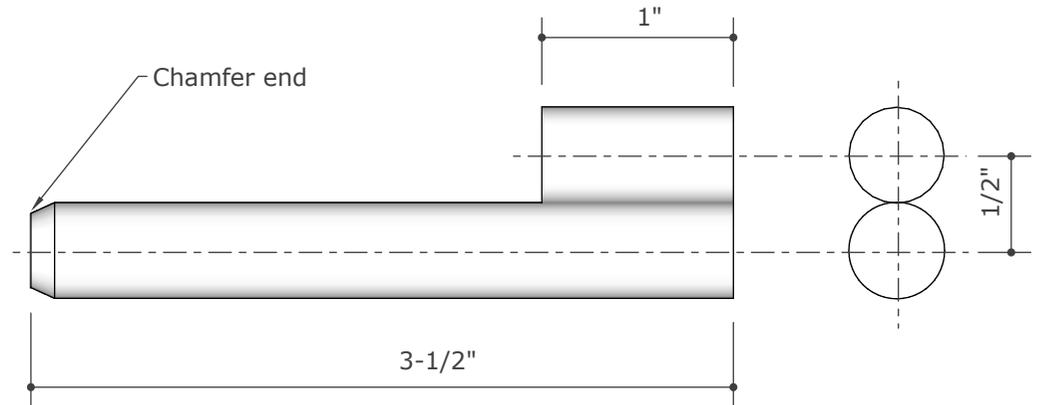

Hinge Pipes
See page 18 for details

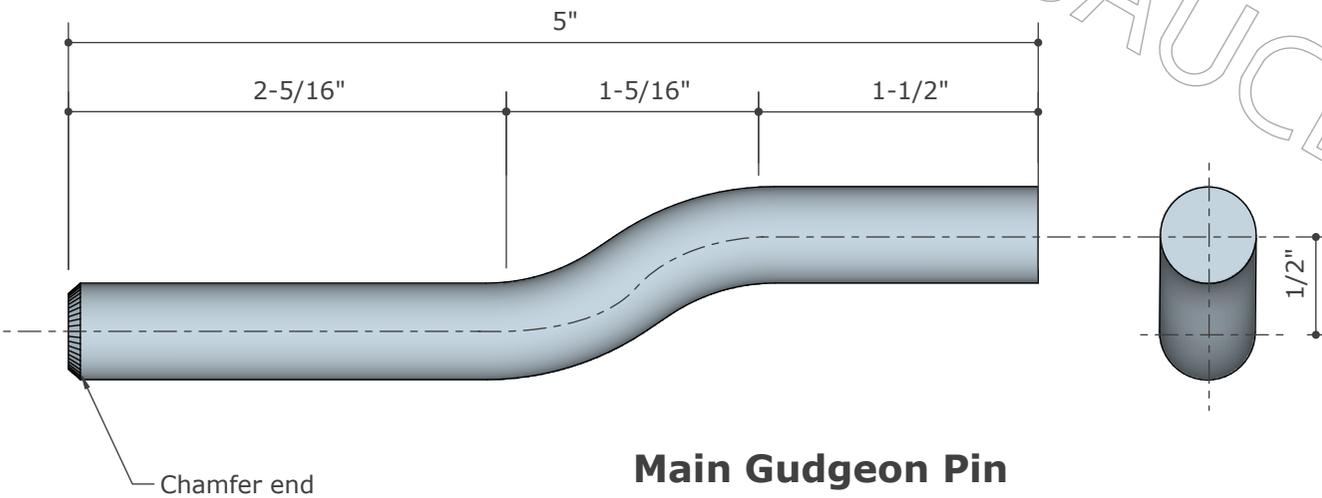

Hinge Pipe

Material - 1/2" Med Nominal Bore Pipe

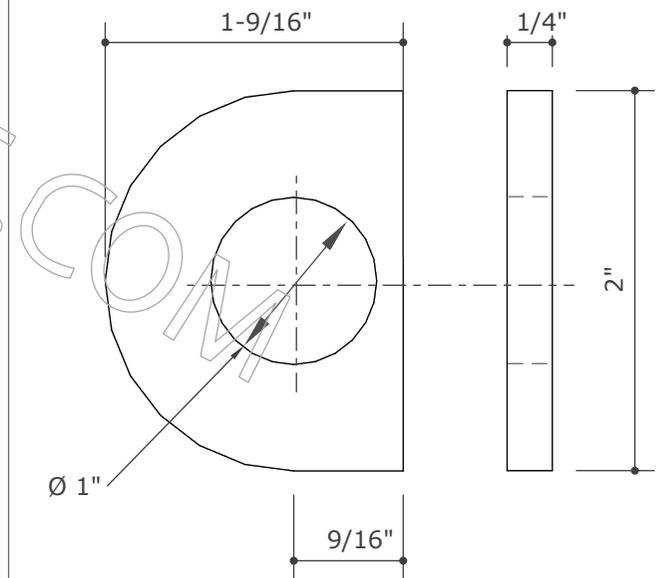

End Gudgeon Pin

Material - 1/2" Bright Round Bar

Main Gudgeon Pin

Material - 1/2" Bright Round Bar

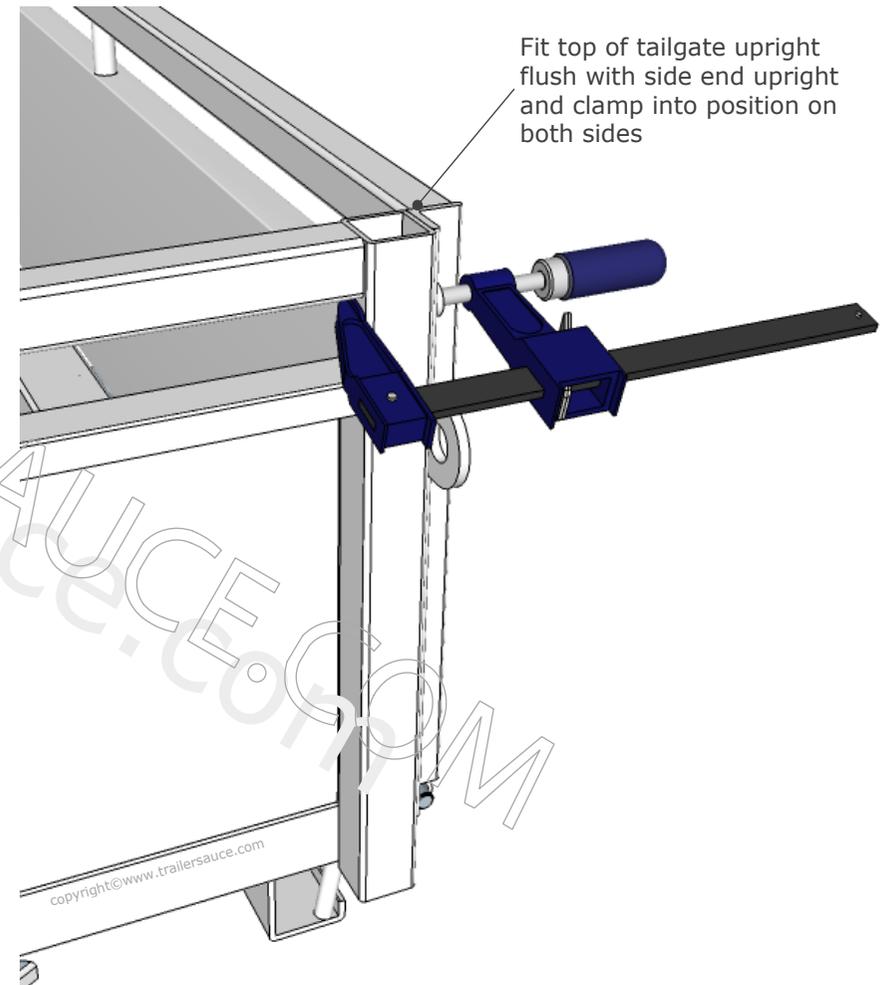

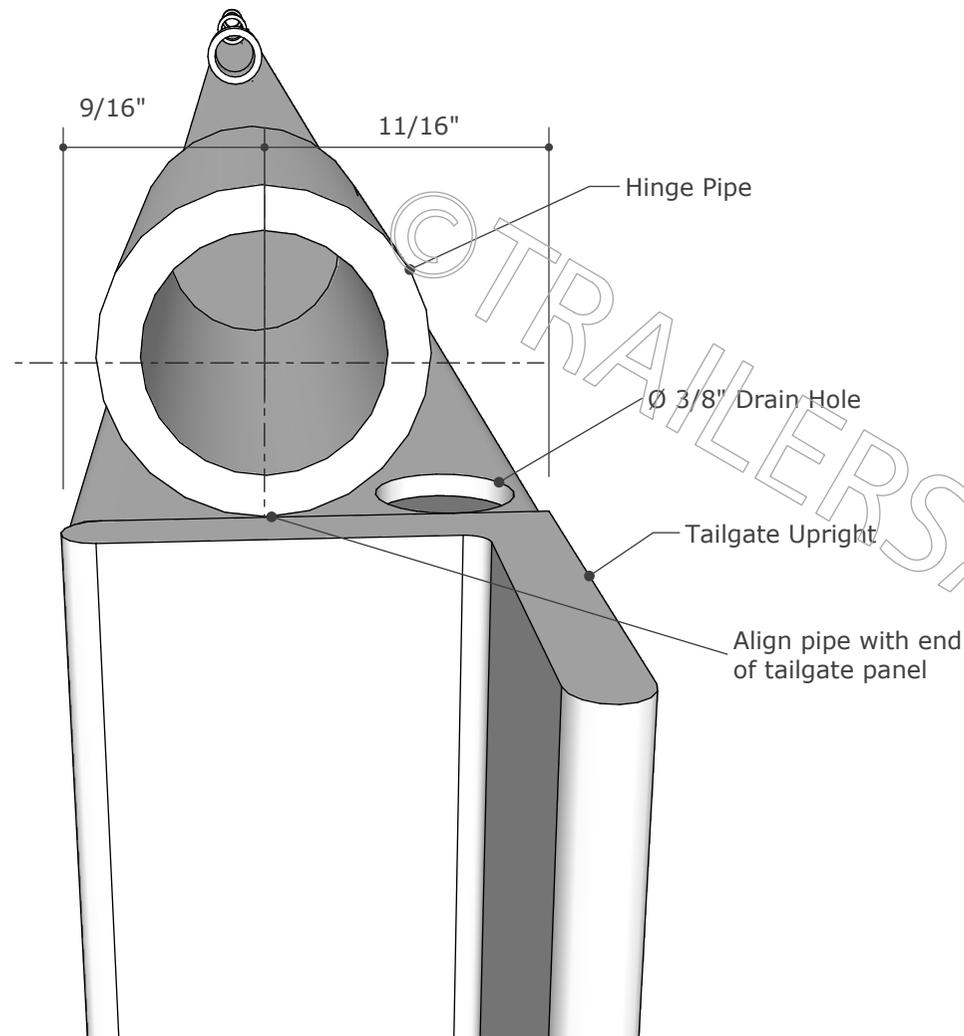

Latch Plate

Material - 2" x 1/4" Flatbar

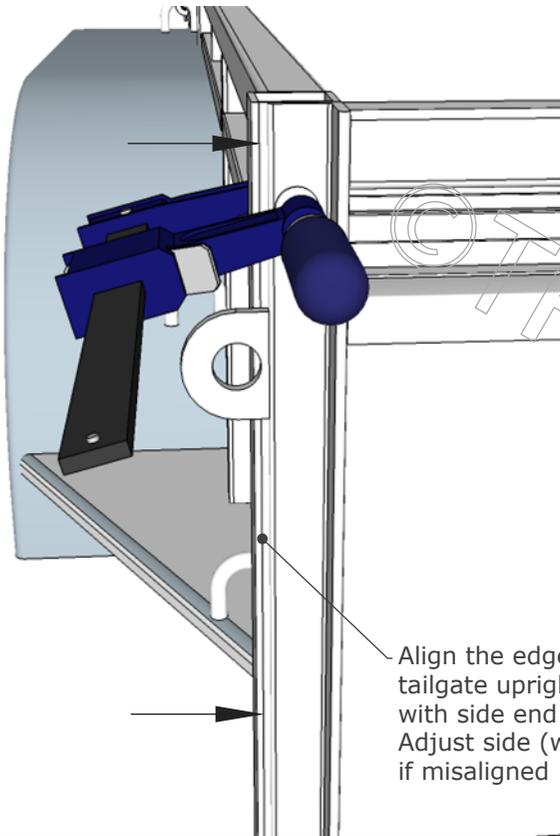

TAILGATE HARDWARE

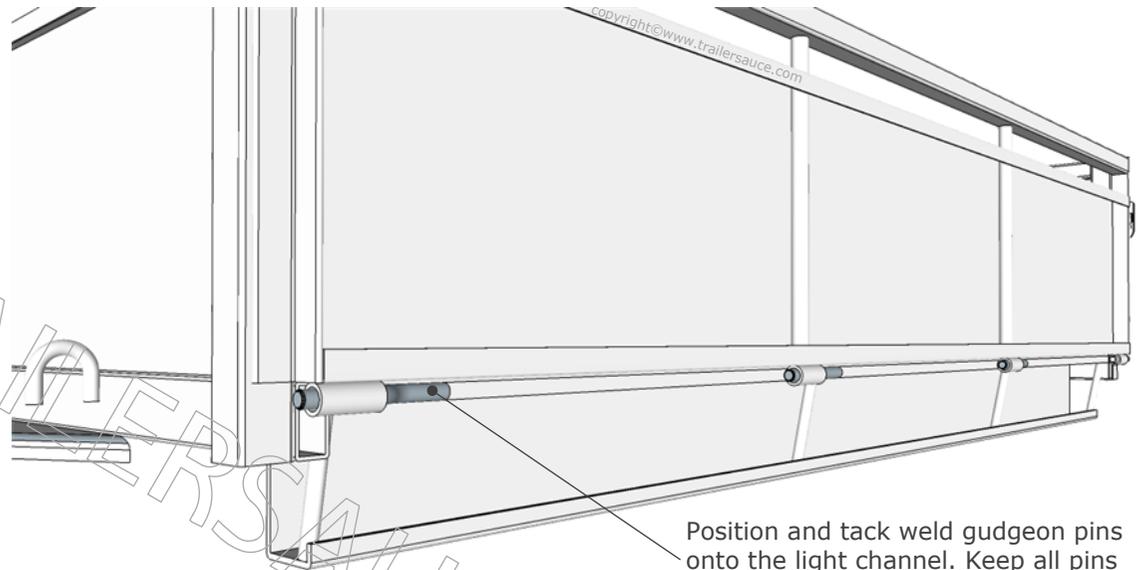

Align end hinge pipes with the end of the tailgate panel and 9/16" from outside face of tailgate to center of hinge pipe.
Tack weld securely.

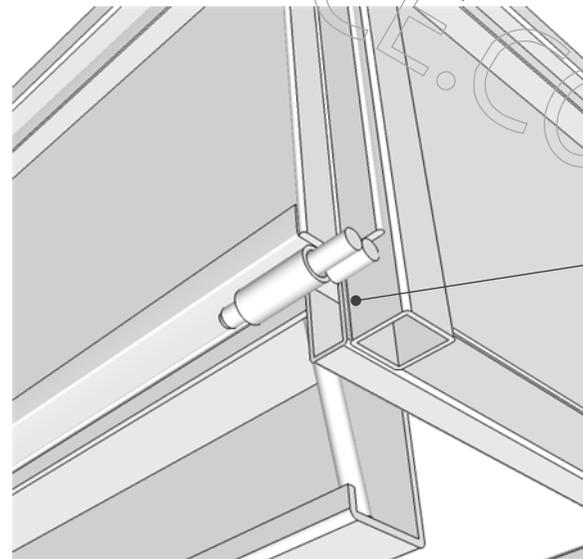

TAILGATE FITTING

Align the edge of the tailgate upright parallel with side end upright. Adjust side (with force) if misaligned

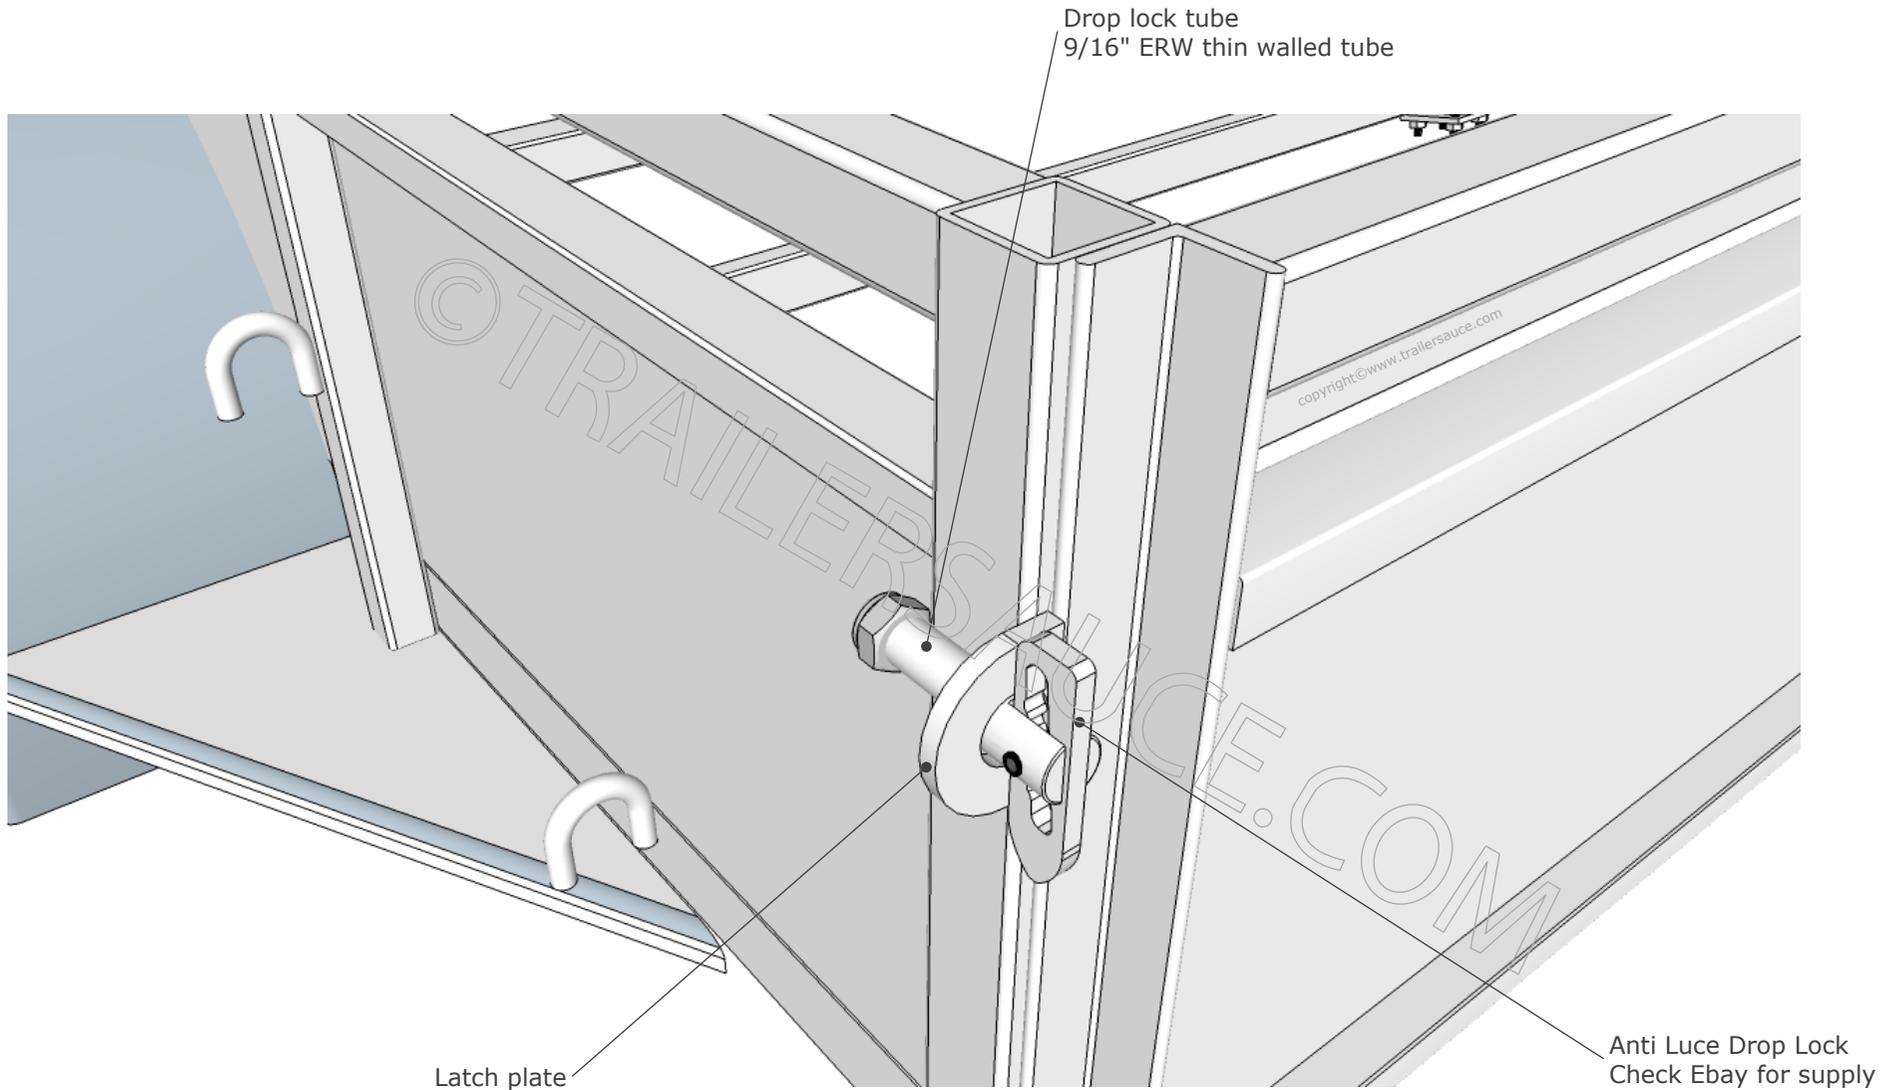

Position and tack weld gudgeon pins onto the light channel. Keep all pins in the same vertical plane.

Position and tack weld end gudgeon onto side upright

Once the gudgeon pins have been tack welded into position, unclamp tailgate & open/close tailgate checking for smooth operation. If binding or stiffness is encountered, cut tack welds on offending gudgeon pin(s) and adjust. Repeat tailgate fitting procedure for front tailgate.

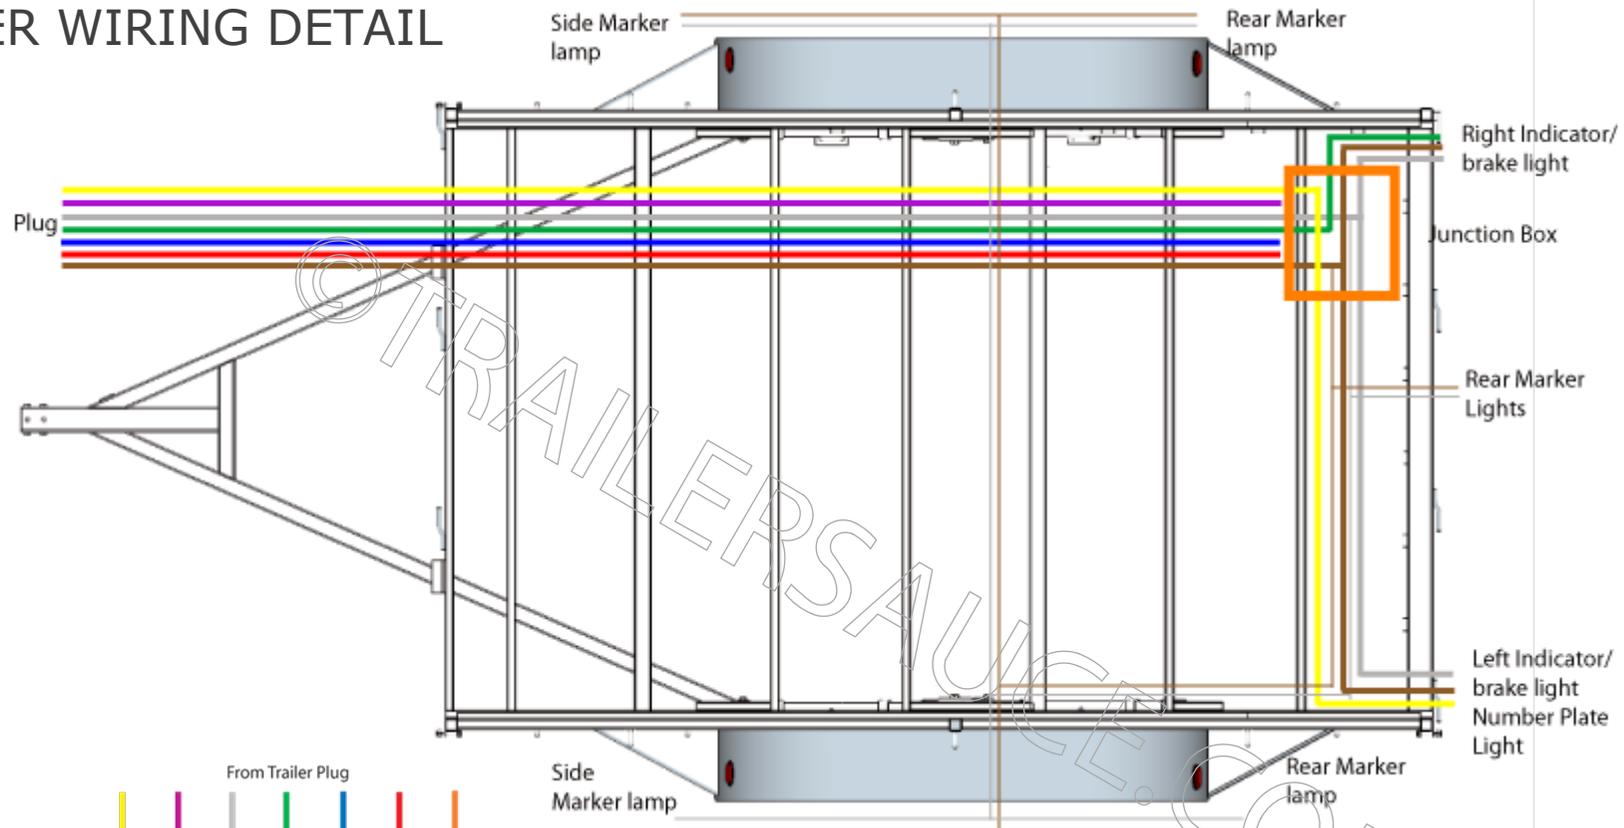

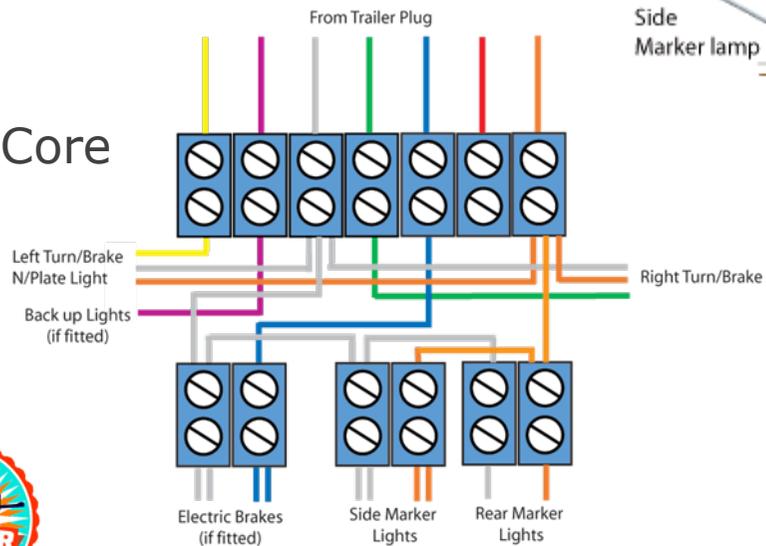

Fit the Anti Luce drop lock onto the drop lock tube and centralize within the latch plate hole. Level and tack weld drop lock tube to the side upright. Check operation of the tailgate before fully welding.
